**It springs like water, from the eyes of a newborn babe
And it brings dreams for the good will long gone missing
as we make our way - 'round the sun
and every star keeps shining**

**It clings like water to the soul of every child
and each life begins with a good will that starts wishing
for love that's real, forever hoping, universal smile**

**Oh, we're here just a lifetime
Each moment so clear and it never comes again
Oh, now is the right time
For good will, hope, and coming home!**

It springs like water, from the eyes of a newborn babe

**And it brings love for the good will long gone missing
as we weave our way 'round one of the many suns
and every child keeps shining . . .**

Good hope
