

# **The Pickens Plan**

**The comprehensive energy plan, devised by one of the most successful businessmen of our time, that will solve the fuel crisis.**

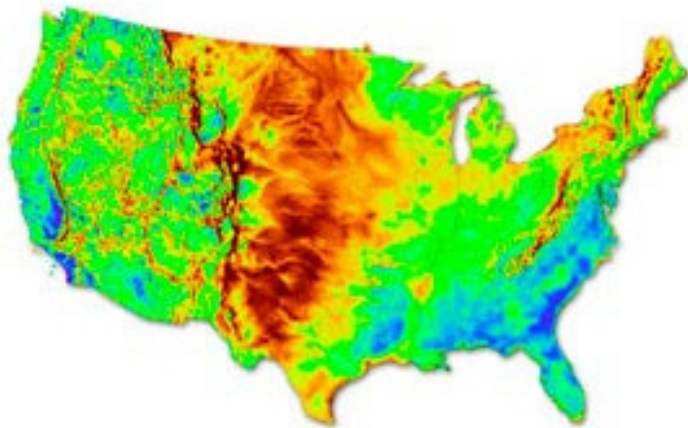

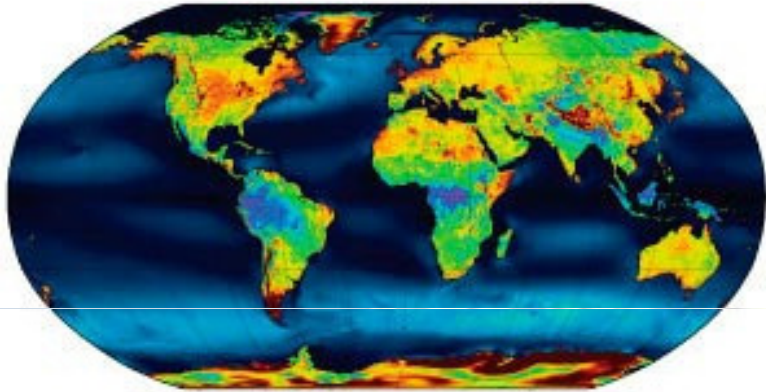

The background of the slide is a map of the Middle East and surrounding regions, including Lebanon, Syria, Israel, Jordan, Saudi Arabia, Yemen, Somalia, Ethiopia, Sudan, and the Gulf of Oman. Major cities like Baghdad, Ar'ar, Tabuk, Ha'il, Khafji, Jubail, Buraydah, Damman, Hail, Riyadh, Jeddah, Mecca, Abha, Jizan, Aden, Djibouti, Khartoum, Addis Ababa, and Muscat are labeled. The Persian Gulf and Arabian Sea are also indicated. A scale bar at the bottom left shows distances up to 750 Kilometres. An inset map in the top right corner shows the location of the Middle East within the context of the world map.

# **According to T. Boone Pickens, Author of the Pickens Plan:**

- **In 1970, we imported 24% of our oil. Today it's nearly 70% and growing.**
- **At current oil prices, we will send \$700 billion dollars out of the country this year alone.**
- **We cannot afford to transfer America's wealth overseas.**

# Wind is the Answer

Wind speed over land

- **The good news? The United States is the Saudi Arabia of wind power.**
- **Developing wind power will result in an economic revival for America.**
- **Wind power is clean and renewable, and T. Boone Pickens is already investing his fortune into this market.**

# Natural Gas as a Transportation Fuel

- 98% of the natural gas used in the United States is from North America.
- Domestic natural gas reserves are twice that of petroleum.
- Harnessing the power of wind to generate electricity will give us the flexibility to shift natural gas away from electricity generation and put it to use as a transportation fuel.

# **Other Technology**

- **Solar, geothermal, and other alternative energy resources should also be part of our energy future.**
- **Within ten years the United States can be independent of foreign oil and on our way to cleaner and more sustainable energy use.**
- **We need your help.**
