“There is an extremely powerful force that, so far, science has not found a formal explanation to. It is a force that includes and governs all others, and is even behind any phenomenon operating in the universe and has not yet been identified by us. This universal force is love...When scientists looked for a unified theory of the universe they forgot the most powerful unseen force...**Love is Light**, that enlightens those who give and receive it. **Love is gravity**, because it makes some people feel attracted to others. **Love is power**, because it multiplies the best we

have, and allows humanity not to be extinguished in their blind selfishness. Love unfolds and reveals. For love we live and die. “Albert Einstein levele lányához
