

# facade2013

There is an ongoing debate between designers and engineers, if our worldwide innovation comes from artistically aims or from technical possibilities. The truth is, both are important and have to be considered. A platform of interdisciplinary cooperation between universities, research institutions, engineers, architects, artists and different companies is needed. Our 7th Facade Conference „Design vs. Development“ will negotiate between the positions to start a dialogue about how to improve the innovation process for facades.

## Design vs. Development

November 29th

- 8.30**      **Registration**  
**9.15**      **Welcoming**  
Uta Pottgiesser, Dean
