

# Triangle Climate & Landscape Researchers' Doggie Bag

Take-Home Info from the Brown Bag on March 14, 2013

## Main Presentation

**Biodiversity metrics for agriculture: A database approach to foster conservation partnerships."** Ashton Drew from NC State University, spoke about how they are using Bayesian models and database tools to link farmers' field-scale decisions with species-level responses and, ultimately, biodiversity outcomes. A pilot project to develop the conceptual framework was recently completed and fieldwork to further develop and test the metrics is about to commence using Christmas tree farms in Western NC as a case study crop. You can see the powerpoint of her presentation [here](#). If you have questions, please contact Ashton.

## Next Triangle Climate & Landscape Researchers' Brown Bag Topic

**April 11, 2013 Dave Wear from the US Forest Service, Southern Research Station will present "Southern Forest Futures Project" from 12:00 – 1:30pm.**

*Location: Ground Floor Bullfrog Education Room, Wildlife Resources Commission Building, NC State University's Centennial Campus, 1751 Varsity Drive, free visitors' parking in rear of building*
