UNMANNED AERIAL VEHICLE (UAV/UAS) INSURANCE

International Commercial Aviation Insurance covering the Hull, Liability, Operations, Manufacturing and Transportation of Unmanned Aerial Vehicles and Systems and multiple environments to include War Zones and Hostile Territories.
One Policy – Total Coverage

Overwatch has partnered with A-rated, financially secure insurers at Lloyd’s of London to provide customized coverage for UAV/UAS system operators and manufacturers. The Policy is designed specifically to meet the operator’s third party liability needs when operating in a Civil Commercial, Governmental, and Environmental or Emergency Services role. Our approach is to provide all of the required coverage in one package policy form creating a total solution for our clients on a highly customizable platform of cover. Our clients get the coverage they need for all aspects of UAV/UAS risk within one form.

Hull Coverage

The value of UAV/UAS systems can be significant and this section of the coverage provides for physical loss or damage to the airframe, payload, launch station and/or GCS during operation or routine testing. This section also provides coverage enhancements to include disappearance if the UAV/UAS is unreported after 60 days as well as providing storage cover for the system in storage or undergoing routine maintenance.

Liability Coverage

This section includes Third Party Liability coverage for Operators, Manufacturers and Distributors. The insurers will indemnify the insured for all sums which they become legal liable to pay such as Compensatory Damages for accidental bodily injury and property damage caused by the UAV/UAS or by any object falling from the UAV/UAS. This coverage can be applied to those operating UAV/UAS in the air or on the ground or while in a hangar or for liability for UAV/UAS products sold.

Transit Coverage

This section covers the Physical Loss or Damage to the UAV/UAS system while in transit to or from the operating environment or manufacturer. The airframe, payload, launch station and/or GCS are covered.

Spares Extension

This section provides key coverage to the very expensive spare parts inventories that accompany UAV/UAS operations. Although these parts may not be at operational risk on the system itself coverage for these spare parts in transit and in storage is extremely important.

Other Required Insurance

Overwatch, Inc. specializes in UAV/UAS insurance and also in the larger category of complex risk particularly in austere environments. We can provide USA domestic and International Insurance to meet the entire spectrum of risk needs for our valued clients.

Who’s watching over your risk?
Overwatch, Inc. continues to work on the cutting edge of commercial UAV/UAS systems in the USA and North America. We see the value of enabling commercial, emergency response and municipal usage of unmanned vehicles within the National Airspace. Although full regulatory approval is still in the future we believe that by developing risk manage and insurance products in conjunction with the UAV/UAS industry now we will be fully prepare to offer the kind of insurance and risk financing solutions required going forward.
