Answer: Page 154

To obtain both factual information and underlying feelings, you'll probably use various types of questions. Open-ended questions invite the interviewee to offer an opinion, not just a yes, no, or one- word answer. You can learn some interesting and unexpected things from open-ended questions, but they may diminish your control of the interview.

The other person's idea of what's relevant may not coincide with yours, and you may waste some time getting the interview back on track.

Use open-ended questions to warm up the interviewee and look for information when you have plenty of time to conduct the conversation.

• Close ended question?

Answer: Page 155

Closed-ended questions require yes or no answers or call for short responses. For example "Did you make a reservation for the flight?"

Questions like these produce specific information, save time, require less effort to answer, and eliminate bias and prejudice in answers.

The disadvantage of such questions is that they limit the respondent's initiative and may prevent important information from being revealed.

They're better for gathering information than for prompting an exchange of feelings
