(121) HYPNOSIS FOR FERTILITY

with Lynsi Eastburn, BCH, CI

Each year, more than a million North Americans pursue treatment for "infertility." Most consult conventional doctors - an infertility work-up is conducted and, depending on diagnosis, drugs or high-tech procedures such as IVF are recommended. However, the success rate for those who undergo high-tech procedures is currently about 20%. To boost this, women are seeking complementary treatments. One of the most powerful of these is hypnosis. Following the guidelines of this program not only increases the odds of conception but also enhances overall health. *Tuition \$375*

(123) 6 KEYS TO WINNING SPORTS CERTIFICATION

with Laura Boynton King, BCH, CI

One of the more frequent challenges faced by all athletes is how to improve their performance. They express frustrations that they often possess identical - if not superior - physical attributes to their competitors, yet they're consistently being out-performed by that competitor. In many cases, the problem is rooted in self-doubt, which limits their levels of performance. Using hypnosis and Neuro-Linguistic Programming, the client will learn how to identify and accept self-doubt. Once this is achieved, the client can stop dwelling on past failures and other negative feelings and images through hypnosis techniques, positive imagery, concentration-focusing skills. Whether the athlete feels held back by physical fear or by negative comments from competitors, trainers or officials/judges or by performance anxiety, the 6 Keys to Winning Sports Certification will help the hypnotist to help their clients replace a "losing" mentality with the winning edge.

(125) INTEGRATIVE HYPNOSIS

With Melissa Tiers, CH, CI

We are in the perfect time to be Hypnotists! Research is not only validating many of our tried and true techniques, it's offering countless ways to hone our skills and utilize how the brain learns and changes. Incorporating practical neuroscience into your work will take your change work into the twenty first century. Everything from epigenetics, which shows us how to turn on and turn off gene expression to studies on the adaptive unconscious, which proves our unique skill set is exactly what people need in order to change deeply engrained programs, this class makes all of this practical. This two day course will teach my integrative approach to change work. You will learn protocols for changing habituated patterns of thought, feelings and behavior by using practical neuroscience designed to rewire the brain. Pulling from studies on the adaptive unconscious, you will learn how to effect change on unconscious biases, heuristics and filters. You will learn protocols for utilizing reconsolidation of memory for changing implicit emotional learnings and counteractive strategies of creating alternative pathways of response. All the techniques are rooted in research from the fields of neuroscience, embodied cognition, and cognitive behavioral psychology.

MON, AUG 14**(211) EMDR - (EYE MOVEMENT
DESENSITIZATION &
REPROCESSING)***with Hansruedi Wipf, BCH*

Eye movement desensitization and reprocessing (EMDR) is a technique in which the client recalls a dramatic or traumatic event while simultaneously undergoing bilateral stimulation that can consist of moving the eyes from side to side, vibrations or tapping movements on different sides of the body. I use EMDR about 3 - 4 times a week in my hypnotism center, especially with cases that seem to be having trouble following instructions, still hold fears or who still need a good convincer. It is a great tool to make you a better hypnotist.
