For tonight's Conversations with Great Minds - Thom is joined by David Korten. David is an economist, author, and former Professor of the Harvard Business School. His political activism has made him a prominent critic of corporate globalization. His 2006 book "The Great Turning: From Empire to Earth Community" argues that the development of empires about 5,000 years ago initiated unequal distribution of power and social benefits to a small portion of the population.

Wife of a Chinese lawyer: he needs care from American doctors following release from a Chinese prison

Mother Sekhmet:

Greetings in the Light of the Most Radiant one; in the Office of the Christ and only in the Office of the Christ, we invoke the loving energies of St Germain!

T: we pray peace, we pray love; we pray infinite bliss

Greetings, children of Ra:

- Indeed these moments we are experiencing, she is experiencing – so awesome to behold!
 - We are achieving what it is to be goddess, god, All That Is; remembering all there is to remember, all that we are
 - when we dropped in time-space density, she said “Remember” and we said we would

- Here we are full circle now; now the work really begins: we are walking the razor's edge and it is about that path that has no path; what we said the end of everything, the beginning of everything.
 - This story is about Her, the Great Goddess, that at this time, great transfiguration is occurring within every particle of what makes up All That Is – all are feeling it;
 - like Judy Beebe said - all the atoms, all the particles are dancing because we know this is the hour of our arrival.
- it is about us meeting ourselves, the critical juncture where we save our bacon, and it is about what is happening inside every particle, every cell, every organism –
 - do we know how many species are leaving in a week, as Abby Martin said? How many languages are going never to be heard again; yet they are being recorded for all time, all space in what we understand as time-space – in the confines of his own Metatronic chip\
- Let us say that all is so magnificent at this time as we are moving in Sat Yuga and her children can't stand it, and that is all that is going on. Only they wish to have such a Lex Luther or Ultron – maybe call it Vader – they cannot be happy without an arch enemy and this comes from the place where they have created their own arch enemy
 - love them on their way to the Dark Rift - nothing else to say except “Inshallah”!
- In another moment of this space time is such magnificent, ecstatic joy with all the kingdoms – She assures us that **there is no mutually assured destruction of any kind within this realm**,
 - It is simply a fantastical story of a giant chess game in real time, yet we all are the winners, so to speak, because we are saving ourselves along with this planet;
 - It [the earth] has already initiated the process of re-birthing itself has begun at such a high, rapid rate that things are turning asunder and with the energy of Sol - Sol is a singularity as well, yet part of the binary, trinary system circulating in the local 'hood – what is happening is we are moving up an octave in spite of our own best interests and nothing can stop this; nothing! The only thing we can do is experience more joy in the cells
 - yet She knows what we see on the transmission box when we see the temples [of the living god – human bodies] having to be in not so nice ways –
 - all of it is about the moments we are on where the divine passion play has so many components and the ones who are at that right place at the wrong time where drones are used, and it is about the criminals over here who can't stop themselves so we could say the Force is stopping them

T: **Maybe** with the healing of the ozone layer, our siddhas come back?

Mo: Everything comes back & comes fully on line

T: On NHK – diagnosing thyroid at a rate of 40% above normal rates in children – how do you deal with it?

- Half the population of west Africa is going bye bye due to Ebola – exactly what they planned

Mo: Correct. Now is the moment where we must allow the Commander in Chief to talk of the real story called 19.5* - what it means and what it means in the exact same configuration on Mars and in other planets of the solar system of 19.5*– it is such a cosmic story

- It is sort of a cosmic joke , yet it is not because the holodeck safety protocols are off!

T: has lots of conservatives on the Bill Maher show!

Mo: Hailey Baber is a good KKK member – you cannot look that white and that dead: there is a problem with reality as we know it!

- It is about the fact that we have been fed a pack of lies

T: trusts that Bill will make it funny!

Mo: he knows how: he os a Master – cannot hang out with the likes of Mork from Orc

- it is about where out of the many – ONE: it only takes one – and we are the One, the collective which is called 140,000 x10 hundred thousand x 10 hundred thousand which equal 7 billions souls that in unison – one heart, one mind – that is how we do it – it only takes one of us, as Neo said
- we are being asked to do this now, and it would be in our best interest to listen to ourselves along

with all of nature that are saying turn off the transmission box and listen with your ears of the skies and to the voice of Goddess who says "Wake the F**** up Now is the moment!"
• If you want to be here, you are part of the solution - we are all one here

T: Nancy Pelosi is main guest at the beginning – she has her leather jacket on!

Mo: There are members of the Congress that think and She cannot say the outcome, because it would change the timelines

No disasters called the I AM map or the Gordon Michael Scallion map where CA goes into the Pacific

T: the water has to be reversed really fast – India, Kashmir, Pakistan are completely drowning – every year you say it and it's worse – and it's bone dry in SW United States

Mo: There are solutions right now – it is what it is about: removing the criminals, the banksters, the dragons

T: In Europe found another ancient dragon - part crocodile something else – 15 m long, bigger than the one in Argentina

Mo: all the brothers ans sisters and cousins – since all are One and there are so many pieces to this
• We must understand that the Kingdom of the Crystal skulls is here: North and South Ameruraca and the story of LM Meru and Aru Meru of Pangea – this story is so far back in our story that she must say that the window through this . . .

Mo: in Santa Fe, there is a march for a public bank and we need it now: don't need to give another dime to APEC, the banks and Koch bros

T: people in Catalonia want to be separate from Spain : 2 of the angular streets were full of people and it made a big V in the middle of Barcelona – have recorded another hour of Robin Williams this week

Mo: she is laughing at Lee Camp talking about the f*** up situation called Earth
• Says she'd better beam up before she forgets her tongue!

Greetings in the light of the Most Radiant One: Kadoish, Kadoish, Kadoist

Ukraine: Poroshenko said all the Russians disappeared out of Ukraine: the ones that were never there in the first place!

R: He was on Mt Kilosh, sitting in the presence of the mountain and the energies to get re-charged
• Believes that what is before us is the path like on the Fools Card – we get to walk off the cliff and we know we can walk with Baba Gi and others who need to come along – it's right now

T: so we keep on working with the growing progressive positivity?

R: The way he feels it in his cells: things are moving in such rapid state, higher and higher in octive, as the scalar waves interact with each other – he calls it the Force - about the greater good that is happening in the Sat Yuga – these ones are sh*t out of luck through the Dark Rift

T: On Abby Martin yesterday [Breaking the Set], she talked with **Elizabeth Kuchinich** - the weeds are going 4" a day, as hard as baseball bats or machetes – will break the machines, they are that hard

R: then we have mutants

T: now they want to add 2-4D to the roundup formula

R: Professor Xavier warned us about this: very soon, we have to know about our cells that are mutating to higher frequencies
