

# Join The Pickens Plan

[www.PickensPlan.com](http://www.PickensPlan.com)

A grassroots effort, inspired by an 80-year old oil tycoon, to reduce America's dependence on foreign oil and to "energize" the U.S. economy.

- ◆ In 1970, we imported 24% of our oil. Today it's nearly **70%** and growing.
- ◆ At current oil prices, we will send **\$700 billion** dollars out of the country this year alone. We cannot afford to **transfer America's wealth overseas**.
- ◆ The good news? The United States is the **Saudi Arabia of wind power**.
- ◆ Developing **wind power** will result in an **economic revival** for America.
- ◆ **98%** of the **natural gas** used in the United States is from North America.
- ◆ **Domestic natural gas reserves** are twice that of petroleum.
- ◆ Harnessing the power of wind to generate electricity will give us the flexibility to **shift natural gas** away from electricity generation and put it to **use as a transportation fuel**.
- ◆ **Solar energy, geothermal**, and other alternative energy resources should also be part of **our energy future**.

We're **organizing** behind the Pickens Plan now to **ensure our voices will be heard**.

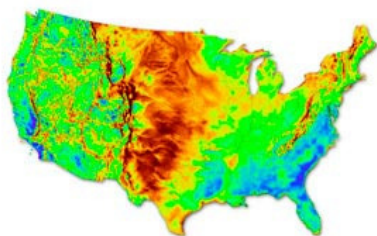

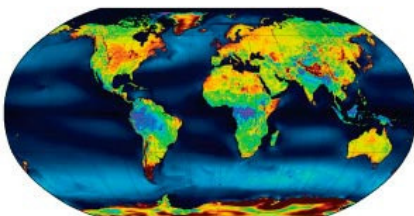

Collaborating together, we can **solve** our over-reliance on foreign oil.

We can **change the future**, for the benefit of us all, and that of our children.

**Complacency is not an option.**

Join us at [www.PickensPlan.com](http://www.PickensPlan.com) and learn what you can do to **positively impact America's future**.
