

County Wicklow VEC SmartVET Project

Teacher Project Guide

3 easy steps:

1. Complete a **Project Plan** giving an overview of the IWB activities you will use in your classes over a period of time.
2. Complete a **Lesson Plan** showing how you will introduce a function or functions of the Interactive Whiteboard. You may choose to simply introduce one function at a time, over one element of the lesson, building to include two or three over a series of lessons, or you may decide to change an entire section of a lesson – the choice is entirely yours, dependent on your own confidence levels.
3. Finally, record your thoughts about each trial of your skills in a reflection on the **Feedback Form** – this is a draft form – we will be publishing a more accessible one on the e-tuitionnetwork site.

Please forward the completed forms to the IWB Champion in your centre by e-mail, for submission to the SmartVET Project Team. Your contributions will help us to develop a really good teacher CPD programme for interactive technologies.

All forms will be available shortly for download from the teacher section of www.etuitionnetwork.eu

Thank you!
