

Bitcoin Will Make new Millionaires In the Next 5 Years! Will You Be One of Them?

Updated: 12-4-17

My One on One Training!

This ebook will teach you where to buy and store your bitcoins. But because there are so many details and options for each system there's no way I can give you every detail unless I made a book as big as the Bible! By the time I made this ebook, it would already be out of date because things change out there!

There's a lot of details involved in securing your wallet to make sure your bitcoins can't be stolen that this ebook is not enough for most people. Most people want their own personal trainer to help them. Some people want bitcoin sources that can get them bitcoins within a day! So I've taken the best trainers I can find and developed a training package that literally turns you into a bitcoin expert fast! It would literally take you months to learn everything my trainers will teach you one on one.

Our team of friendly and patient trainers are second to none! I realized that nobody could offer better training than the people who have already trained hundreds of people around the world! They will teach you everything you need to know about bitcoin and will work around any schedule or time zone around the world. They will also answer any questions you have.

Bitcoin is one of those things best learned by simply doing. That's what my trainers do! Using Skype they can teach anybody how to buy, sell, and use bitcoin as easy as if they were sitting in your home right next to you!

I am offering the best price on one on one training for only \$97. You will have a trainer with you on Skype so they can show you step by step everything you need to do. When you are finished, you will know how to use bitcoin, send bitcoin and receive bitcoin. You will get access to even more sources for bitcoin than are in this ebook also if you have trouble getting bitcoin too. You will be able to ask questions of your trainer after your training for 30 days also so you're never alone out there!

To get access to my training, you will need to have at least \$200 available to put into Bitcoin. You will pay the \$97 for the training using bitcoin once my trainers help you get your bitcoin wallet setup and secured and your wallet funded. If possible we suggest you start with \$1000 simply because we have sources that can get bitcoins within hours for \$1,000 or more! Nobody can get you bitcoin as quickly or as cheaply as our sources! It took us months to find this source and this alone is worth more than the \$97 we charge. If you don't have \$1,000 to put into bitcoin you will need at least \$200.

Email me at glenn@nsearch.com and send me your Name, email, phone number and Skype ID if possible so I can get one of my trainers to contact you. You only lose if you don't do anything.

After you've sent me your information, I'll put you next in line for training. My trainers will help you with everything! They will work around your schedule and answer all your questions. You will know everything you need to know when they are finished. They will show you how to secure your bitcoin wallet so it is 100% secure from theft!

Let's go make some money with Bitcoin!

Bitcoin is a once in a lifetime opportunity

If you cut your expenses, sell what you don't need and regularly invest in your long term "no touch" Bitcoin account, I believe it's very possible you could make a million dollars or close to it within 5 years! This is a huge chance to be involved in a game changing technology like Bitcoin before the stampede comes in. Believe me, far less than 1% own bitcoin! Just think what the future holds when EVERYBODY wants some bitcoin next year!

There won't be another Bitcoin opportunity because cryptocurrencies are a game changer. If you miss this bitcoin wave because you're too lazy to contact me for training, you're going to be kicking yourself later. You either get rich with bitcoin by getting in now and adding to your bitcoins while it's still VERY early or you are literally going to be sick when you see Bitcoin hit \$15,000, \$20,000, \$100,000, \$250,000 and eventually a million per Bitcoin as I and many others predict will happen. Yes, I believe even one bitcoin will make you a million dollars or more in the future! If it hits a million dollars and you could have bought a bitcoin for just \$11,000 as of today do you know how silly you will feel? Just buy some bitcoin and hold it long term! You don't have to buy one bitcoin either, you can start by buying \$200 worth or whatever you can comfortably afford to do! Of course as with any investment, you never want to go into debt buying bitcoin or put most of your wealth into it since you should also have some real estate and precious metals for safety too.

The reason bitcoin will go up is because far less than 1% of Americans even have any bitcoin! But they are starting to wake up and they want to get some! They're hearing about it on the news almost every day and that's why you want to be in NOW before 5%, 10% and 20% have bitcoin. There's a limited supply of Bitcoin, only 21 million! And some of those have already been lost forever by people who simply threw them away by mistake! What do you think happens when you have actually less than 21 million of something where far less than 1% of the population has any of them but eventually 20% or more of the world's population will want to get them? It explodes in value! Supply and Demand to the maximum! So if you get just one bitcoin and hold it, you could be a millionaire if Bitcoin hits a million a coin someday! Stack as much as you can afford into bitcoin and you're going to be very happy! That's my promise!

Here's a video where they predict Bitcoin hits \$250,000 by 2020!

<https://youtu.be/8fP2PjuldZk>

Cliff High and his Webbot program says between \$500,000 to \$1 million a bitcoin. I told people to get into bitcoin heavy at \$400 and now it's \$11,500 and taking off like a rocket! You haven't missed it yet though so don't worry! I just heard 30,000 new people are opening up bitcoin accounts daily now! Just stop procrastinating and do it now!

First thing you need is some Bitcoin! Get a Coinbase and Blockchain account first. If you email me at glenn@nsearch.com and tell me want our one on one training, my trainers will hep with all of this.

CoinBase

VERY IMPORTANT! I recommend everybody get a Coinbase account and also a Blockchain account for your bitcoins. I like having backups when it comes to bitcoin just in case you ever want to move your bitcoins from one company. But you can start off by just using one of the accounts if you want.

The first thing you must do is immediately get an online Bitcoin wallet account so you can get some Bitcoins. A wallet is just an online website to store your bitcoins. You can eventually get a hardware bitcoin wallet like a Trezor and store them at your home too after you get a lot of them.

You need to first get a www.coinbase.com account because this can be funded from your bank account. I recommend you get this one and get it tied to your bank account. It takes about a week to do this but while you are waiting for the process to complete you can get a Xapo.com and Blockchain account too which is important have also as backups. When you get trained by my trainers, they can usually give you a way to purchase bitcoins faster in most cases also if you have any problems getting bitcoin as fast as you want. You can ask them when they contact you about this.

Email me at glenn@nsearch.com if you want to sign up for my \$97 one on one training program. I have the best trainers in the world and no matter where you live on the planet, they will train you.

Xapo

Get your bitcoin wallet at <http://www.xapo.com>

This seems to be a very good bitcoin wallet with lots of nice features. I like this one as a backup to Coinbase because you can hook it up to your bank account just like coinbase.com. Sometimes people have had their coinbase accounts cancelled for no reason. So my recommendation is you get accounts at Coinbase, Xapo and Blockchain. Then you have backups!

Height	Age	Transaction Name	Size (KB)	Hash	Fee (BTC)
15024	11 min	...	1.00000000	...	0.00000000
15023	12 min	...	1.00000000	...	0.00000000
15022	13 min	...	1.00000000	...	0.00000000
15021	14 min	...	1.00000000	...	0.00000000

Blockchain

Get your Blockchain bitcoin wallet at www.blockchain.info

You can't fund this one with your bank account or credit card but we can use other services to buy bitcoin and have them sent to this wallet while you wait on your Coinbase account to be fully operational.

Here's a video that will walk you through the process of getting an account at Blockchain.info

<https://youtu.be/yArW94tcFfE>

Remember, Blockchain should be used for all programs in this ebook. You buy your bitcoin from Coinbase and then transfer it to your Blockchain account. That way you should never lose your valuable Coinbase account that lets you buy Bitcoin cheaply!

More Ways To Buy Bitcoins!

If you need another option at buying bitcoin because you can't get a Coinbase.com account, I have listed some other ways to get bitcoins next. My trainers also have contacts that can usually get you bitcoin within just a few hours.

Glidera

<http://www.glidera.io>

If you can't get a Coinbase account then get a Glidera account asap! They have excellent rates and you can purchase from your bank account!

Gemini

<http://www.gemini.com>

Good rates on buying bitcoins from what I've heard and I was told you can buy from a bank account which usually gives you the best rates.

Coinmama

<http://www.coinmama.com>

Coinmama charges about 8% over spot prices typically but it's fast. You would use this if you couldn't get any of the other ones I've told you about.

LocalBitcoins

<http://www.localbitcoins.com>

If you shop around on here and only deal with vendors who have good reputations you can probably get Bitcoin for 8% over spot.

There are even Bitcoin ATMs where you can put in Cash and get bitcoins. Some of them charge huge 22% fees but some are as low as 8% so you should check them out too. Here's a site that lists them and lists the fees they are charging.

<https://coinatmradar.com>

Now that you know where to buy bitcoins, you'll also want to be sure to read how to secure your bitcoin wallets so hackers can't get into them. Every company has different ways to do this and you will find information on this on the bitcoin wallet websites.

One on One Training

I know bitcoin can be a bit scary when you start. It was scary to me when I first did it too. Luckily I had a friend that showed me how to do it the first time. That's why I created a bitcoin training package so you didn't have to do this alone or make mistakes as some people have done. Did you know that some people have actually forgotten how to get into their bitcoin accounts or left them unprotected and they hacked! There are a lot of things to consider here so I hope you will consider investing just \$97 into a training package. You will make this back in bitcoin very quickly anyway as it rises. It will save you a lot of time and aggravation. Just one of the bitcoin sources my trainers are authorized to give you is worth more than this price because they can get any amount of bitcoin over \$1,000 in just hours! It can sometimes takes weeks for a new person to get their account setup and funded! So investing just \$97 one time will be the best investment you can make in your financial future!

I can usually get you trained within a few days of you emailing me at glenn@nsearch.com

The training is one on one. Just you and my instructor. You will pay for your training using bitcoin after they make sure your account is setup properly.

Email me at glenn@nsearch.com if you have decided to get the \$97 Training package and I will set you up with your own trainer as soon as possible!

I hope you will get started with your bitcoin training soon so you can have your bitcoin within a day! I've included a few more things for you as extras but remember email me at glenn@nsearch.com or Skype: ProjectNsearch so I can schedule you with a trainer soon! Welcome aboard the Bitcoin Rocket! You're going to make a lot of money with bitcoin over the next 5 years. Someday maybe you'll buy me a beer! :)

Word of Warning on Programs that Promise to make you bitcoin

I used to list several programs in this ebook as ways to earn more bitcoin. I don't do that anymore because most programs out there are far too risky for the average person. I do not want to lose anybody money on things out of my control. My focus is strictly on training people how to get and hold onto their bitcoins safely and make a lot of money in the future!

The company I work for, Nsearch Technology, runs a ministry at www.project.nsearch.com. I began using this bitcoin training program to fund this ministry starting on December 4th, 2017. The Nsearch ministry wants to help people financially by showing them how to buy and use bitcoin.

Nsearch Technology wants to do great things for the Lord as we grow. We do not want anybody to lose money. Therefore when I brought the training program into Nsearch, all programs I used to recommend were taken out of this ebook because every program has risk. While bitcoin will fluctuate in value during the short term, it will rise greatly over the next 5 years in our opinion. This long term growth over the next 5 years will bless everybody we train in bitcoin! There will be no losers long term which is what God wants!

I know some of you like to gamble a bit and will decide you want to do a program you will find out there so I will give you some rules to follow if you just can't help yourself from joining a program out there at some point. These rules will insure your risk is much lower!

If you are going to get into any program on your own, then follow these simple rules.

- 1. Only do one program after careful study – make sure you pick the best one because there's a million of them! Most will fail. No need to do more than one. If you get ALL your money back on your first program then and only then can you do a second one that meets all these criteria. Then you only do a third program when you got all your money back on your first and second programs!**
- 2. Make sure the program you choose has paid people steadily for at least a year! Don't even consider it unless it's been paying for at least a year! 99.9% won't last more than a year. Ignore all new programs, they are just shiny objects trying to get your bitcoins!**
- 3. Risk no more than 10% of your bitcoin account in this one program you choose. Don't put more into it unless you've gotten back all your original investment. Focus on growing your bitcoin stash and don't dip into it unless it's literally an emergency! In the future, one bitcoin could literally be worth a million dollars so don't crack your bitcoin piggy bank unless it's a huge emergency and you have no choice. Focus on making more money and saving more money so you can add to your bitcoin stash monthly! Every dollar you put in there could be multiplied by 100 within 5 years!**

If you follow those 3 simple rules, you will stay safe and only risk 10% of your bitcoin which can be recovered as bitcoin goes up in value.
