## CYBER ENGINEERING OBJECTS [CEOs] ENGINEERING 2050 Workshop

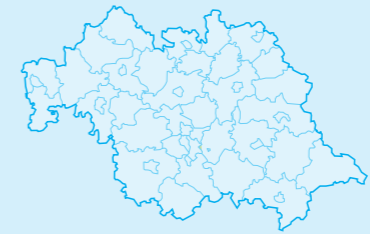

January 28, 2017  
 14.00 – 17.00  
 ZOLLHOF – Entrepreneurship Centre, Nuremberg, Germany

We begin to define Cyber Engineering Objects (CEOs). CEOs enable the engineering for the production of the future. The CEOs shall cover all aspects of the engineering, being complete, open, extendable but still lightweight. Workshops will be conducted to bring the ideas together. We involve process engineers, automation engineers, computer scientists and artists according to the philosophy of the project. The cornerstones of the CEOs are to be described and a prototype is to be implemented.

- Presentation of the first ideas of Cyber Engineering Objects on IPEC 2017, March 29, 2017.
- IV\_ Realization of CEOs: July 2017

Participation for free. Registration until December 16, 2016 at [matthias.barbian\[at\]barbian2050.com](mailto:matthias.barbian[at]barbian2050.com)

THE PROJECT ADDRESSES ENTREPRENEURS AND SCIENTISTS

AND STRENGTHENS THE COOPERATION BETWEEN  
 (INTER)REGIONAL PLAYERS.
