Machines Room + Maker Library Network

OPEN CALL : MACHINES ROOM MAKER LIBRARY MAKER IN RESIDENCE
Machines Room looking for makers to create an inspiring Maker Library community

1. **Maker Library Network**
    The Maker Library Network is a British Council project that connects designers and makers internationally. A Maker Library is a creative space for making, showing and reading, containing three key elements of a makespace, a gallery and a library, connected via an online platform. Through these unique networked spaces makers swap skills, share resources, exchange ideas and take part in mentoring sessions. The Maker Library Network concept was created and developed by Daniel Charny and From Now On in collaboration with the British Council.
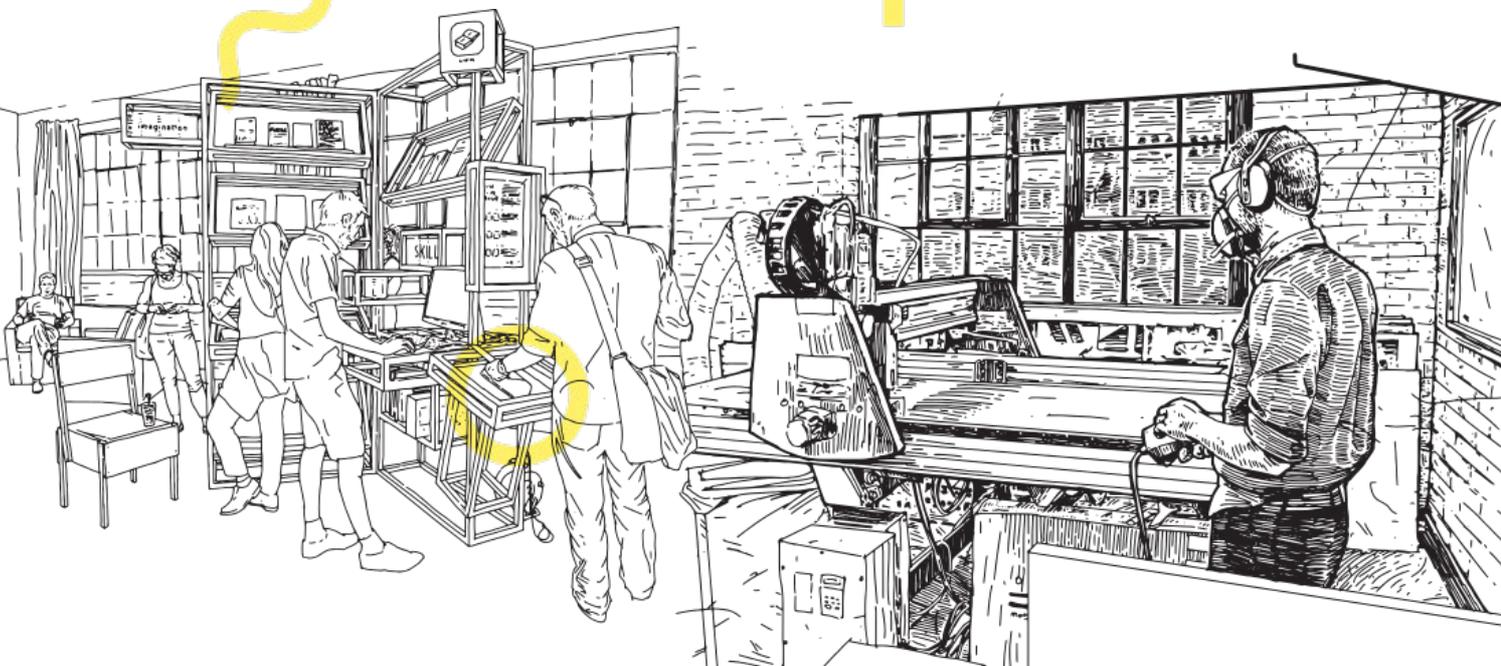

2. **Machines Room**
    Machines Room is East London's Impact makerspace, founded by Thomas Ermacora in 2014. Situated in the heart of the Maker Mile, a thriving hub of art, design and creative technology, it is open to the public and businesses to come and fabricate their ideas using a full range of CNC machines and workshops for processes such as laser cutting & 3D printing. Our programme explores critical making and positive futures, particularly new concepts such as Open Making, Open Source, Sharing Economy & Circular Economy. We have been part of the Maker Library Network since we opened and in that time have hosted 12 Makers in Residence who have each spent a month experimenting with processes and materials, creating exciting projects ranging from 3D-printed breathing heads to geodesic construction kits and mechanical techno machines.

3. **The Residencies**
    This open call is for a new phase in the program with focus on impact through making.
    There are 3 residencies to apply for:

    i.   One Month Project Residency
    ii.   One Month International Residency
    iii. **6 Month Professional Residency (this pdf is for this residency)**

SIX MONTH PROFESSIONAL RESIDENCIES

1. **6 Month Residency Offer - £150/month**

   The professional six month residency is makers trying to make a living out of making we offer:

   i. **Subsidised Desk Space**

   Machines Room has worked with designer James Tooze to develop a Maker Library edition desk. This dedicated desk space (rented for £150/month) is foldable and lockable. Residents can access the space 24 hours and have their own set of keys (residents are expected to provide some cover in the space and sometimes open and close the space). Machines Room has a lot of space and residents can spread out providing the space can be cleared for commercial bookings.

   ii. **Training and peer support**

   Machines Room staff will train you on machines and share their time and skills with you.

   iii. **Access to tools & machines**

   Included in the fee, Makers in residence receive one month's membership and have 'drop in' access, meaning if a machine is not booked you can use it.

   iv. **Modest Storage**

   We can offer a small locker and a large cupboard for your bits and bobs.

2. **Support for 6 Month Residencies from Maker Library Network**

   i. **Mentorship (http://makerlibrarynetwork.org/mentors/)**

   During the 6 months, residents can request group crits from the MLN pool of mentors. You will also be part of a selected peer group.

   ii. **Opportunity**

   Previous residents have had the opportunity to travel to other maker libraries to deliver workshops or for their work to be shown. Residents will be considered for MLN opportunities such as travel exchanges, events and showcases
   iii. **Exposure**

   The residency will be documented on http://design.britishcouncil.org/ and http://makerlibrarynetwork.org/ sharing your work with a global design network. Projects are promoted using the #makerlibraries hashtag. https://twitter.com/hashtag/makerlibraries?src=hash
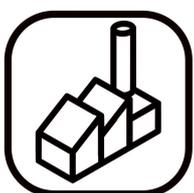

**MAKERSPACE**   **SUPPORT**   **TOOLS**   **SPACE**
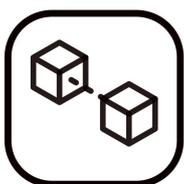

NETWORK   **MENTORSHIP**   **OPPORTUNITY**   **EXPOSURE**

SIX MONTH PROFESSIONAL RESIDENCIES

1. **Professional Resident Attributes:**
We are looking for special people with exciting projects to join us

   i. **You must make things**
   You work must have a tangible output that has a need for machinery or workshop space.

   ii. **Ambition to grow**
   This six month period is to kickstart your project (even make a kickstarter campaign!) We will incubate you and your idea.

   iii. **Individuals**
   We only have space for individuals on the residency desks, but if you work with other people, they can become members (£5/month) and join you in the space.

   iv. **Impact**
   We will prioritise applications from projects that consider circular economy, social design and critical making.

   v. **Innovative**
   We are also excited by new processes, machines, and skills and welcome inventive applicants who are developing new techniques and want to share them.

   vi. **Regular**
   It is important that during the residency Machines Room is your main place of work.

2. **How to apply**
   i. **Fill in this google form: https://docs.google.com/a/machinesroom.org/forms/d/1hyNS4xyf8zYDwx_uHfgHfJn5TnR0pCyWV3pnemszcJc/viewform**

3. **Selection**
   i. Selection will be made by a panel made up of Machines Room and Maker Library judges.

4. **Dates**
   i. **Sunday 15th May - submission Deadline midnight**
   ii. **Selection 16th May (Please be available to meet/skype us in this week)**
   iii. **Start date: 6th June**
