# Green Chemistry in the Classroom: Tools and Networks that Catalyze Adoption

## GEMs Database

- > 100 educational items
- Searchable by chemistry concepts, laboratory techniques, target audience, green chemistry principles and source
- Includes databases, journal articles, DVDs, and original contributions
- Provides additional resources contributed by educators from across the country
- Threaded discussions facilitate rapid adoption

## Green Chemistry Google Map

> 500 individuals and organizations world-wide from education, research, industry and NGOs

## Green Chemistry Education Network

Advancing green chemistry through a global network of educators who develop, implement and disseminate greener educational materials.
