

# Teacher **Onboarding**

## **REFLECTIVE QUESTIONS**

Answer these questions either before or after feedback with your trainer. This will help you reflect on your teaching.

---

### **Engage**

Were the students engaged? How do you know? What did you do to create rapport? Could you have done anything differently or added anything to increase engagement?

---

### **Understand**

Did the students understand the context for the lesson? Content? Instructions? What examples from the lesson support your assessment? Could you have elicited, explained or instructed differently?

---

### **Learn**

What did the students learn? What did they do or say that leads you to believe this? What feedback did they receive? Was there anything they didn't learn that you would have liked them to?

---

### **Personal experience**

Compare and contrast your personal experience in training this week with the lesson you just taught. What engage/understand/learn techniques do you think were transferable to successful teaching of your students? Which ones may not be transferable? Why?

---

### **Next time**

If you were to teach this lesson again, what changes would you make?
