

# INVITATION TO ART OF HOSTING IN EDUCATION TRAINING PROGRAM

February 17 (18:00) – February 21 (15:00)  
Seminars and resort centre in Dubingiai, Lithuania

*5 days of conversation, contribution & practical action towards education that works for everyone.*

## ABOUT

Art of Hosting in Education is an international 5 day training program for all education stakeholders who are passionate about the future of education and who want to together explore **how to create a better learning and collaboration culture in our schools, communities and organizations.**

## PURPOSE

The purpose of this event is to build and strengthen relationships between all education stakeholders (school leaders and teachers, representatives of government agencies, university leaders and staff, students, educational consultants, non-governmental organizations, business representatives and politicians) and empower their network to act together using participatory practices.

## HOW IS THIS EVENT UNIQUE?

- All the participants take part in deep conversations that really matter instead of hearing lectures or debates.
- Collective knowledge and collaboration is at the heart rather than individual dreams and goals.
- We gather all education stakeholders from a student to a government official in one room instead of having participants who represent just one group.
- The decision making and implementation process engages all stakeholders instead of relying on experts who know the right answers.
- We use appreciative inquiry to focus on what works well, and how we can work together to make this happen more often in the future instead of focusing on problems.

## YOU WILL:

- Learn new social methodology and participatory tools to work with groups of people, run effective meetings and activate collective intelligence, from a group of 3 to 1000 people;
- Experience a powerful framework that enables you to strategically evoke leadership, refocus conversations, and apply methodologies that support people to get engaged, become clear on their commitment and take action;
- Learn the main theory behind systemic transformation, innovation and process architecture;
- Hear national and international success and power stories;
- Have an opportunity to work on your own projects, get feedback and support from other participants, and design action plans that are meaningful and relevant to you and your organization.

## HOSTING TEAM

Toke Paludan Møller (*InterChange*, Denmark), Monica Nissén (*InterChange*, Denmark), Laura Weisel (*The TLP Group*, USA), Phil Cass (*Columbus Medical Association*, USA), Mary Alice Arthur (*SOAR*, New Zealand), Diederik Bosscha (*Dock20*, The Netherlands), Aurimas Razanauskas (*Co-Creating Communities*, Lithuania), Ricardas Alisauskas (*Ministry of Education and Science*, Lithuania), Andrius Chomicius (*Klaipeda university*, Lithuania).
