

**1** 13058 39th Ave NE  
Patrick Linder  
We have 280 sq. ft. of annual garden, various perennial and flower areas, fruit trees, an edible and medicinal thicket, and chickens that we keep using a deep bedding system.

**2** 2515 NE 107th St  
Aylee Welch  
SUSNE helped start this garden with a sod removing party Nov. 2011. Now the garden includes veggies, fruit, and ornamentals. The focus is on medicinal plants and is certified as a Botanical Sanctuary by United Plant Savers, an international organization working to save plant medicines and forests, and revive cultural traditions of plant medicine.

**3** 1517 NE 107th St  
Bill Aston & Christy Nordstrom  
Garden consists of 9 "raised beds" built from scrap material. Rain catchment cisterns (1,000 gal.) cap off other garden features of interest. Some of the raised beds are adaptable to cold frames for winter planting. Looking to exchange ideas on how to improve the production of edibles.

**4** 10342 Ravenna Ave NE  
Sue McGann & John Samaras  
Sue and John have a large vegetable garden, fruit trees, berries, grapes, herb spiral, greenhouse, water catchment and more. Park on-street and walk up the driveway past the green house to the blue studio in the back. Please Do Not park in the driveway.

**5** 9815 32nd Ave NE  
David Johnson  
Established garden features espalier apples and pears, raised beds, unheated greenhouse, and small fruit crops.

**6** 9512 30th Ave NE  
Kim Sims  
Kim's garden is in three parts: 1) Front garden is sunny with perennials & shrubs; 2) back garden is shady with NW natives; 3) the farm next door is where I took over my neighbor's front garden and planted it with edibles.

**7** 7321 21st Ave NE  
Colleen Whitten Sax & Stephen Sax  
Tea and Tour! Browse flowering hedgerows, NW natives habitat. Sunny front yard is an established akebia arbor, fruit trees, an espalier and ornamentals. Shadier backyard features layered borders with playspaces, a backyard cottage, rainwater catchment, an urban farm of raised beds, berries, and a chicken coop.

**8** 7308 23rd Ave NE  
Susan Gregory  
Susan and Joel's 30 year old garden has mature fruit trees, soft fruits, chicken, bees, and veggie gardens, in addition to ornamental and wildlife friendly plants, and several composting systems. Rainwater catchment and solar panels round out this urban farm!

**9** 6841 40th Ave NE  
Keith Mastenbrook  
This large garden with two houses has a mature planting in the Edible Forest Garden style. The garden contains many types of plants, including native species and exotic species, some ornamental and many edible, useful, or good for wildlife. There are also a few vegetables, but due the many

trees shade limitations make that difficult. Also demonstrated are sustainable practices for composting, and a long established rain garden that absorbs most of the roof catchment.

**10** 7018 47th Ave NE  
Scott Baker & Jenise Crane  
Sustainable practices like Urbanite walls and Hugelkultur planting beds, and raised beds and a kitchen garden are featured with many native species and entertaining spaces.

**11** 5521 31st Ave NE  
Joann Kerr  
Veggie garden started in 2009 as an experiment for Sustainable NE Seattle, to remove a grass yard and replace it with a veggie garden to be gardened by a beginner. A front yard plot and containers with hugelkultur in the backyard.

## Sustainable NE Seattle Urban Farmers

# 2017 GARDEN TOUR

Saturday, JUNE 17, 10 AM – 2 PM
