Family Historian? More like Family History Detective. Your investigative skills will be honed whilst exploring and unravelling ancestors' trails through the paper trail of source material they left behind.

Your lateral thinking potential will develop and be tested as you look at and beyond the more obvious pathways to your forebears.

Find out how your ancestors coped with the challenges of their times and dealt with changes in their environment and circumstances.

Sample original material and internet resources, examine handwritten documents and experience a variety of recording techniques to help you organise yourself and your forebears.

More reticent ancestors will be coaxed and teased out of their hiding places with no stone left unturned and brought back to life by researching how they lived their lives.
