Hard News:

T: asking people to think of contributing, and of keeping, using the positive thought

T: Chris Christie case: Bridget Kelly will be fully cooperative if she is given some considerations

Ed Show: Bob Schrum and Karen Finney were on: Bridget Kelly's family was threatened and the implication is Christie is behind this;

- He is pushing things in people's faces: the money to pay for his report came from the people of

NJ; he is pronouncing himself clear and criminal free.

Randi Rhodes: met Sheldon Adelson last year: worse than Larry King: he made some moves on her last year; he is lucky he still has his hands!

- Is Rand Paul the other piece of work that Shelly might support? Or Jeb Bush?

Ed was talking to Bernie Sanders today: behind the scenes, the Bush family does not want to risk another Bush in the White House; know the name is tainted. After some discussion, Barbara Bush said well OK

R: Mother's children are in the final death throes – send them more love: more and more crimes being committed: blatant racism, crimes against those who are poor

Randi Rhodes: said she had to take a day off; if I didn't, me and Harry Reid were going to have a private conversation; she is at the place of out of the frying pan and into the fire with these ones; they

have committed high treason

- In the next moment, it's about serendipity and synchronicity of the time line we are in:
 - it is the final walk, even if it seems aimless, there is a trail of breadcrumbs that shine like the sun.
- As **Nada said**, people will end up where they end up because she who was here before the gods were here will do what she has do to

Turkey: going like North Korea, banning Twitter and YouTube;

- There are plans in Turkey to intervene in Syria in a way that is not right: making out it is just precautionary
- The Golan Heights are on the Turkish & Syrian Borders – israel went in and bombed the *** out of Syria and now Turkey thinks they can do the same.
- Barack Obama went to Saudi Arabia

R: this is **only about the stargates in Syria:** Assaud is a side issue

T: Rachel's report last night about the nuclear arsenal and the 9 officers who got fired – cheating and getting drunk – things falling apart.

Japan: possibility of a major quake under Tokyo; and the SE section of Japan, the Nikei Trough

- gov't not playing around: setting up disaster zones. Shinzu Abe saying the quakes could have serious effects on the country and its economies.
- 310 municipalities need to take immediate action – on the scale of 7, the expected is 6.
- Hokkaido known as the treasure chest of wild animals, yet the lack of predators mean the animals are invading the farmers' gardens, fields; number of hunters dwindling as people become vegan;
- Climate change and warmer temps mean the deer are surviving better and are highly fertile.

Audio: Thom Hartmann, **Conversations with Great Minds – Billy Parrish – March 28, 2014**

- glacier retreating and source of water for 400 million people in India was at risk.- source of Ganges River.
- **Chasing Ice** – a documentary on the effect of climate change on glaciers.
- Energy Action Coalition – tells Thom all that the members have accomplished in getting people and institutions to re-think their investments of money in the fossil fuel companies.
- One of the ideas people need to realize is that energy based on fossil fuels was entirely unnecessary; it is possible to live on 100% clean energy.
- There are **investment products for people who wish to invest in clean energy.**

On tonight's show **a double Conversations with Great Minds.** Thom talks with Dr. Michael Dorsey about climate change and if President Obama has lived up to campaign promises on climate policy, plus what needs to happen to address the issue. **Thom also spoke with Billy Parish about the role younger Americans are playing in the struggle to prevent climate change.**

Conf Call:

Caller: sounds like some do-do about to hit the fan

T: Chris Christie: David Samson resigned today – a biggie!

- The report put out yesterday was just a pile of fluff: his lawyer team [same team as the Rudy Guiliani support team]
- Now gone to kiss Adelson's ring: T & R heard earlier today that Adelson will not support him
- Bridget Kelly got a suspicious threatening call that her life and that of her children are in danger
- Also, Christie completely trashed her in the report!
- **Jimmy Carter** will be on Bill Maher tonight
- Killed and cloned by Bush Sr in 1977 because of his movement towards solar energy

• **Obama went to visit King Abdullah today:** have issues agreeing on things because

- Abdullah upset that Obama would not go into Syria and for what he is doing with Iran;
 - there is a line of demarcation between Shia and Sunni in Saudi Arabia, and
 - The only solution these ones have is creating war somewhere!
- **Yellowstone:** in 1997 and 2002, the rivers were hot and boiling over: no fish: not good!
 - D'Yanna explained it is an 800 mile caldera underground – the geyser in the centre of Y'stone is really small: if it blows, there will be just a big hole down to Boulder, CO and to the west coast.
 - Marietta's report was that one quarter of the elk herd were running from something, & panting from the heat
 - The "I Am America" maps have had this showing since the '70s – these ones could stimulate this and make things go faster if they can't get their way with a war.
 - Huge storms going through now – not just water, but moving mud! No one knows how to deal with it.
 - Talking of what is going on in **Washington state**: it was a beautiful valley to start with
 - **The land along the west coast of North America has only been above ground for 5,000 years**
 - As far in as Idaho, the land is volcanic
 - Review of what Billy Parrish talked about
- Caller2:** speaks of the Keshe Foundation and the Tesla Towers: only a few are required for entire countryside
- Caller3:** asking about an organic machine that is creating these late snowstorms?
- T:** no, just that the weather lately is being created by those on the wrong side of the fence – equipment on the space satellite; the machines are not on earth: on the ISS
- Caller** has been reading about something beyond the satellite with the weather modification technology
- R:** does not know, just that they have technology to change the jet stream with scalar waves from ISS
- Caller:** asking about how to influence whatever may be there
- T:** Use the Law of One
- R:** Ashun and Akasha on the Radiant Rose Academy have specific decrees
- Caller:** concerned about stuff we do not know about
- T:** there are icebergs, more forming & growing below the surface of the ocean
- **What Billy Parrish said tonight: we do not need fossil fuels any more**
 - Shift your consciousness and make a space for the new ideas
- Caller:** how will the galactics fill in the holes where fracking has happened?
- T:** there are 2 technologies Keshe is applying:
- One is being able to create water out of thin air
 - The other can extract carbon dioxide out of the air
- Refers to **Parrish discussion: algae can be grown from garbage and not create carbon dioxide while it is happening.**
 - In the news tonight, about oil companies in Russia and Siberia fracking the **** out of the place as if nothing else was happening in the political sphere.
- Caller:** imagines handcuffs on one side and things being healed on the other
- T: Obama's visit with the non-Pope Pope:** the issue of the poor and marginalized – His Holiness has the capacity to open people's eyes and have them see what is going on
- He has discussed in the past the cynicism around the question of people locked out of opportunity
 - they discussed abortion, same sex marriage, contraception – decided to focus on what they agreed on: capitalism does not exist any more – it's plutocracy, oligarchy; which creates the inequality and the marginalization
 - they were to meet for 20 minutes and it became an hour.
- T:** they are so stuck in Saudi Arabia:
- yet the Saudis are the ones who called the Farm Claims Act back into the fold
 - \$42 Trillion from the Saudis was deposited in the bank in Chicago – Feb 22, 1997 – they were the

only country that was solvent

- In 1999, Brazil went down; the IMF gave them a loan which resulted in bringing down the rest of South America because all the people left their own countries and went to Brazil.

Ukraine: \$27 billion will go there from the IMF, the US – this will be Greece #2

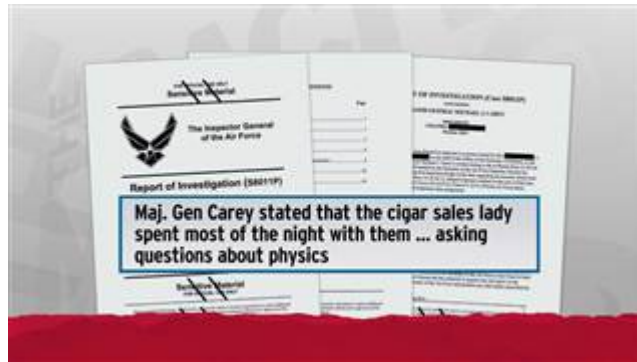

- In Kiev today – there's a lynching team who tied up a leader and shot him in cold blood out of revenge.

Caller: speaking of Obama, Putin and Xi – they are working for good?

T: Yes – Xi met with Merkel – were all at nuclear summit in The Hague, created by Obama 4 years ago.

- \$30 - 50 billion a year between the 2 countries so this won't change
- Xi distanced himself from Putin
- There was a comment that China needs to upgrade its judicial system to be fairer
 - Also, their people are dying due to the pollution from the coal and the black soot which is a by product of bituminous coal - so the environmental thing is also going to level the playing field
 - have to upgrade their technology too
- China is creating solar panels and sneaking them into Germany – quite a to-do about it
- Brings up North Korea and the death camps there, and how they treat their people

T: describes the Rachel Maddow segment about the 9 air force men being disciplined for cheating on the exams they have to take to maintain their ratings as caretakers for the nuclear weapons underground.

Rachel Maddow 03/27/14

Nuclear base scandals raise concerns of 'rot'

Joe Cirincione, president of the Ploughshares Fund, talks with Rachel Maddow about firings at a U.S. nuclear base over a cheating scandal that was exposed following a drug scandal, and discusses whether the U.S. nuclear mission is inherently troubled.

Mother Sekhmet:

In the Light of the Most Radiant One, and In the office of the Christ and only in the Office of the Christ, we invoke the loving energies of St Germain and the Violet Flame.

Greetings, Children of Ra!

Indeed, this is the moment: a crude awakening, a rude awakening, as it is called: we asked ourselves to show up at this time; the hour is nigh and she says "Welcome, well met! The energies are ripe for revolution, evolution!" and it is about the evolutionary leap in quantum reality.

- We might not see the ultimate end of the forest through the trees, yet we are at the end of the forest;

Treebeard is waiting to say "Now is the time, let's do it!" It is happening in the moment, now!

- The world has said "There is enough time that has passed; our wayward children have nowhere to turn except to love – that is the one thing they will accept on their way to the next dimensional reality called The Dark Rift.
- They have designed this for themselves; that story [9/11] keeps coming full circle.
- Why is it that we have no answers, only answers that are about the double headed eagle, the ancient occult symbology and, with due respect, the folks of Sumer and Nibiru much time has passed; things are not as they were in ancient Sumer – cannot use the old magic like you used to, it ain't gonna work! There's a new cat in town!

- The fact of the matter is that things are happening at the whim of the nauqual – it is unusual, unexpected: you are at the stop sign and the next thing you see is some friends from 30 million light years away and they wave and say "Follow us if you can!"
 - It is the place where you and I are one.
 - All the events unravelling right now are about the great story that has come full circle after how many eons – and just this 26, 826 year cycle is one whisker, one wink of the eye: it is about the one issue that we all came to do – transfiguration within the laws of divine right livelihood –
 - "Make me an instrument of thy peace, Lord; where there is injury, let me sow love, as well as pardon
- Those who have committed those acts against the mother, Gaia/vywa mus the people: it is full circle.
 - solutions are popping up all over the place – come out of the cracks when least expected
 - the indigo crystal children have the answers that are being put into manifestation.
 - Very soon even though an idea is new – the concept of 3D printers: what a story!
 - why would you want to use a 3D printer to create a gun? Why not create some food, or a heart, or a way to produce enough for everyone, or why not a replicator as the next evolutionary leap?

T: they are creating robots with those things now, Mother

- Of course! Artificial Intelligence is getting quite a foothold, but not down the road of Cyberdine – that fictional story which is all too real: by July of this year, they want to strap on an Iron Man suit to our men in Afghanistan. Why would they take something which is of a valiant way, and use it for evil and not for good; it is the wayward way these life forms have played with.

T: They have gotten themselves into something they do not know how to get out of

Mo: they are in so deep, they have bought their own fictional story, the fallacy, the matrix..

- The real reality is that when you step in – you are not only ascending, you are also descending in to these temples of the Living God: it is a merging of that consciousness of All That Is, and that is the real test.
 - As you merge this consciousness with this temple of the living god, can it stand the frequencies of the energy of a sun – this is where you came from, this is where you are returning to
 - it is a bit abstract to think about being such a being as a sun, and yet we all are sons and daughters of the most High
 - This fantastical story is about Diverstiy in love – the issue of the day: we created this as well as the horrors of war: there are sections for the Milky Way Galaxy that have never seen war
- it is all eyes are on this moment, because the timelines have changed and the events are on the borders of Crimea, Ukraine –
 - This story is about the fake money; all of it is – not to change the subject, but al Jazeera had on a story called "Holy Money" about getting into the Vatican.
 - It is time people know where our money has gone – to line the coffins of these so-called immortals who are not immortal. It is a cosmic dance about love and even more frequencies of love; how we do this in these moments is the greatest task; this is the only story here.

T: All time is present **Mo:** yes, it is all NOW; **T:** if we try to go to 3D solutions, we will lose our minds!

Mo: there is no 3D solution; this goes beyond the realm of the left brain; go into the right side of the brain – into intuition, serendipity, synchronicity of the universe

According to Greg and his calendar: the Gregorian calendar by someone called Greg?

- Very bad jokes indeed!
- She is saying that according to our calendar, the Mayan calendar has ended and we are in a new cycle and how we create the magic of what the heroes and the prophets have spoken of for eons and it comes into manifestation: the children shall lead and the lion and the lamb
- Another story happened today: a lady got to hear for the first time in her life: was deaf from birth and got to hear again – used technology ; the first song she wanted to hear was “Imagine all the people”
- It is time:

T: today is the 35th anniversary of the Three Mile Island nuclear disaster: Kevin a nuclear scientist said it is emitting 1000x more radiation than they will admit?

- Can we see some of this technology – thinks Keshe got stopped at Fukushima in January
- The Atimarians must be pretty busy

Mo: yes, or we would not be having this conversation!

- It is in the moment, let us so love our situations; as we walk this pathless path off the cliff with the white dog in the backpack – holy hobos, as it were!
 - the answers for the situations: all that is going on across the planet is the up-wising of the people to the fact that we can go no further unless we take the evolutionary leap in consciousness which takes the next step
 - which is the merging, the descending, the ascending – it is already happening with the indigo crystal children who are already switched on.
- Miracles are happening every day in spite of the toys & the weapons of war; her children have come to the crossroad –
 - the next evolutionary leap, quantum leap, is about love and they can't accept it – many have crossed over and said they would accept love, but the stalwarts who are committed to the very end – so be it! That is why we have Julian Assange, Ray McGovern, Chelsea Manning; Edward Snowden: and why is Valerie Plame still fair game and Scooter Libby still walking free?
- It is about this: the next step is miracles about how extraordinary circumstances change ordinary events – involves the every day reality which is not really every day reality because her world has already merged with ours - **5D is here and already moving up in octaves to 6, 7 and higher.**
 - In spite of the misdeeds going on, there are highly credible beings here with “magic” that she calls the “super science” of love; as you apply the principles of quantum physics, working with the crystals, the gold, the gold dust,
- The reactors Keshe speaks of working with the energies of the magnets that are beyond magnetism – it is about understanding scalar frequency

T: brings up the hydrogen batteries in the wheels of cars so they never need gas

Mo: Thorium – **T** says it is nuclear sort of thing **Mo:** it can be changed in molecular structure

T: Mo mentioned something that Keshe had: using nuclear fusion, beyond thorium – no off gasing
They use this stuff on the ships

Yes. They are starting to play with the idea of matter and anti matter which is an anomaly

- better know what you are doing, as you are playing with the creation of the universe: anti matter is an anomaly and you might not get what you expect – dark matter takes you to the unexpected.
- The CERN story – creating the Boson particle. It is only this place, these ones trying to remember the cosmic recipe of how to create life: it is only about merging with Self, as your Twin flame in the cosmic kundalini experience.
 - Something from the laboratory does not work: the lab is the universe and we are an interactive part of this, where everything is held in frequency, in balance and how you interact with respect, grace, beauty, with love is how you get it done.

T: Abby Martin said last night that, in 2012, about 8 million people died because of air pollution
Mo: and we never had to burn another piece of coal or a drop of oil; all we needed to do was ask Mother Earth and Father Sky
T: breathe this breath of prana
Mo, T: do sounding

• Greetings in the light of the most radiant one: kadoish, kadoish, kadoish

R: Has been sitting on the Sphinx's head – quite a view of Giza Plateau. Sitting there just to receive the energy – what is pouring into this planet now puts him in total awe: it is all about love! If these ones have even one shred of decency, they will comply with the law of god – all he has to say!
T: feels the higher energy, like sweeping wings moving through the maya!
R: time to go talk to the oracle at Delphi

INFORMATION RELATED TO THE NOTES

2014, Mar 29 [MUST-SEE: Bill Maher calls on Democrats to stand up and DEFEND Obamacare](#)

by [BruinKid](#)

Last night, Bill Maher called out Democrats for running away from defending Obamacare, which would only lead to more defeats come November.

Now last week in this space, I congratulated Democrats for finally learning how to use the right words to sell their ideas. This week, I'm going to ask for something in return — that they actually *own* those ideas. **Stand your ground. when a Tea Partier says Obamacare is a government takeover, say, "I wish!" Because that would mean Medicare for all!**
(*audience cheering and applause*)

Video and full transcript below the fold.

http://www.youtube.com/watch?v=RQRiSSC26ic&feature=player_embedded

And finally, **New Rule: Crazy idea division.** Since there's an election coming up, Democrats might want to say something about what they're proposing to do for America sometime between now and November. (*audience applause*) Crazy idea.

Everyone is predicting disaster for Democrats in the midterms, and their response seems to be, "Yeah, sucks to be us right now." Well, maybe that's because their basic talking points always start with an apology. Like, "Obamacare is far from perfect, but...." **NOTHING'S PERFECT!!! But you don't start with pointing that out about something you're supposed to like!**

"Hey Bob, how's your wife?"

"Well, she's not perfect, but she beats masturbating alone."

(*wild audience laughter and applause*)

Now last week in this space, I congratulated Democrats for finally learning how to use the right words to sell their ideas. This week, I'm going to ask for something in return — that they actually *own* those ideas. **Stand your ground. when a Tea Partier says Obamacare is a government takeover, say, "I wish!" Because that would mean Medicare for all!** (*audience cheering and applause*)

And you know, Medicare is hugely popular in America. So let's see. Getting behind something that's hugely popular, for all. No, too hard a sell.

A year ago, Kaiser polled Americans on what they thought of Obamacare's individual provisions. 80% liked the idea of exchanges. 76% liked kids staying on their parents' plan. 71% liked Medicaid expansion. Two-thirds liked the ban on pre-existing conditions. Half the people in the survey were like, "Hey, why don't we get Congress to do these things?" Oh, you mean the things the Democrats had already done, but are keeping it a big secret?

No wonder the Republicans have such an easy time selling their argument about Obamacare, which is basically, "Hey, we tried it, and it was a big failure."

How about volleying *that* one back with, "WHAT?! We're still signing people up, for Christ's sake! How can we even *know* if it's a failure?" What we *do* know is that Sarah Palin and Rick Santorum said it would kill their children. **No, you guys are thinking of assault rifles.** (*audience laughter and applause*)

We also know that in 2010, Republican Senator Tom Coburn [said](#), "There will be no insurance industry left in three years." Always the drama queens!

The Republicans run ad after ad of Obamacare horror stories, but where are the success stories from the Democrats? You just need someone who's seen a gynecologist, not Bigfoot! (*audience laughter*)

Shoot a college kid on your phone! "Hi, I'm Tony, I got the clap on spring break. Good thing I was on my parents' plan, cuz now it doesn't hurt when I pee. Thanks, Obamacare!" (*massive audience applause*) It's not like you're trying to sell a Vince Vaughn movie, this is a *good* thing! (*audience laughter*)

And while we're on the subject of the Democratic Party owning what they should be proud to own,

this guy is a perfect example....

(*audience cheering*)

Jimmy Carter is a perfect example of the way Democrats meekly go along when the Republicans create a false meme like Carter's "failed" presidency. Failed by whose standards? We may not have had a great economy in the '70s, but I'll tell you something else we didn't have — a war. (*audience applause*) Carter was branded a wimp, but the real wimps are the Democrats who never had his back for the achievement of never firing a shot while in office. (*audience cheering and applause*)

And the courage of being the last President to ask Americans to sacrifice. And yet, when Obama talks fondly about a President from his youth, he cites Reagan as an inspiration. But Obama's supposed to be an environmentalist. He should be inspired by the President who put solar panels on the White House roof! (*audience cheering and applause*) Not the President who came after him and tore them down because he thought the sun was interfering with Nancy's astrology!
