What is the Click Millionaires "lifestyle design movement"?

I believe that innovative use of the Internet can help you make more money online, and redesign your daily schedule, life and career to live more on your own terms.

A properly designed and marketed e-business takes less time than a traditional job, allows you "flex time" to work when and where you want, and allows you to be your own boss, too. On top of all those benefits, you'll find a huge boost in self-esteem by starting a successful business of your own.

In other words, starting your own e-business and working online can help you enjoy life like a millionaire even if your revenues don't reach that level.

My books, podcasts, and the Click Millionaires online community are all full of real world "mom and pop" entrepreneurs who have successfully started businesses like this part-time or on-the-side of their traditional jobs. With some clever but often simple ideas, dedication, and hard work online, these entrepreneurs run exciting new e-businesses that you'll learn more about as a member of the private Click Millionaires social network.

What makes them Click Millionaires is that while their online businesses may "only" make \$50,000, \$150,000, or \$500,000 each year, *they don't have to measure their success purely in financial terms any more.*

Their lives have been fundamentally improved by becoming self-empowered Click Millionaire entrepreneurs. Many Click Millionaires don't even track their work hours because they have succeeded in making money doing something that they love! That's a "*millionaire lifestyle*" even if the business doesn't quite generate that much cash.

Join our Click Millionaires "lifestyle design movement" to redesign your life and career to make yourself a Click Millionaire, too.

Who are you and why are you doing this?

I'm **Scott Fox**. I'm a successful e-business entrepreneur and Author of two best-selling Internet business books: ***Internet Riches: The Simple Money-making Secrets of Online Millionaires*** (AMACOM, 2006) and ***e-Riches 2.0: Next Generation Online Marketing Strategies*** (AMACOM, 2009).

My personal success story has taken me from the inner city to worldwide success online. Along the way I put myself through college at the University of Michigan, hit big as an investment banker on Wall Street in New York, graduated from Stanford Law School, started my own venture capital-backed dot-com, built several multi-million dollar online businesses, partnered with celebrities to start profitable online entertainment channels, and even started the digital department of a Fortune 500 consumer products company.

Based on all this experience, I wrote my two best-selling books that share "***insider secrets***" for success online. Click Millionaires is the next step forward in **my personal mission** of helping regular folks like YOU profit from the e-commerce revolution, too.

I believe that the money-making secrets of Silicon Valley dot-com millionaires and today's cutting-edge Internet marketers deserve to be shared more widely than they have been so far. E-commerce, online marketing, and web site publishing are the most powerful business tools the world has ever seen. ***The problem is that many people (like you?) have still not been invited to the dot-com party!***

My own career and my books have proven that innovative application of the latest e-commerce technologies and online marketing strategies can turn your hobbies, passions, and expertise into profitable online businesses. I'd like to share this expertise to help you find success online, too.

I started the Click Millionaires community specifically to provide an affordable resource that can help you succeed online, even if you don't have much of a technology or business background.

My specialty is helping coach new entrepreneurs, business owners, corporate marketers, and now YOU to make as much money as they can online. The Click Millionaires community gives me a platform to do that.

The future belongs to those who take advantage of the Internet.

If you share my fundamental belief in your potential, are interested in new business strategies that can both make you money and improve your lifestyle, AND, if you care enough about others to promise to give back to the community, too, I hope you'll join me today.

There are now almost two billion potential customers online for your Click Millionaire business. **I'd like to help you get your share of this e-business revolution.**
