From Democracy Now!, April 9 headlines

[ADDED ON MONDAY, APRIL 9]

Notorious arms smuggler Viktor Bout, known as the "Merchant of Death," has been sentenced to 25 years in prison for conspiracy to commit terrorism. Our guest, former United Nations arms trafficking investigator Kathi Lynn Austin, says the case allowed American companies to avoid exposure of their collusion with with the U.S. government and private companies linked to Dick Cheney during the Iraq war, even after United Nations sanctions against him in 2004. Authorities say Viktor Bout was involved in trafficking arms to dictators and stoking conflicts in Africa, South America and the Middle East. He has also been accused of furnishing weapons to al-Qaeda and the Taliban, and achieved particular notoriety for selling arms in Rwanda in 1998, just four years after the Rwandan genocide. [includes rush transcript]

Guest: [Kathi Lynn Austin](#), former arms trafficking investigator for the United Nations and executive director of the Conflict Awareness Project, dedicated to tracking global weapons traffickers and exposing the illicit world of war profiteering.

Headlining the Left Forum 2012 at Pace University, Michael Moore speaks about the importance of Occupy Wall Street and the direction of the progressive left in general.

He encourages the audience to mobilize around this rare moment -- when 99% of the working and middle class are waking up to the fact that most of the institutions in the country work for the benefit of the very wealthy and the corporations. As he put's it, "they know that the game is rigged."

This rousing speech, featuring an introduction by economist Richard Wolff, ends with Michael Moore saying "let's not lose this moment" and leading the crowd to Zucatti Park.

A mighty outpouring of Light , Love and Blessings from Jesus the Christ and all the House of David: Mary Magdalene, King David, Saint Germain , Mother Mary , Anna,.....will take place this Easter week , a great opportunity of blessings so we can ask for direct Divine Intervention in our lives and quicken our Path of Resurrection into our full Christ Consciousness .

The Full Activation of the Ascension of Jesus Christ Ascension will be take place this Easter 2012 a very powerful time all in preparations from now to May 21, 2012, to August 15 and to December 21, 2012. To discover more details about this watch the full video message from Akasha and Asun from the Tree of life Class March 28, 2012 .

Miracle Fiery Christ Easter Blessings !!! ♥♥♥

May the Fiery Christ Light and Power of Jesus Christ Emanuel awaken within you the Fiery Christ truth , the way and the Life of the Mighty I AM Presence that lives within you and above you !!!
Almighty I AM (3)

Welcome to the Dispensation of the Rose Pink Ray to the Earth, the Return of the Divine Mother's Presence, the Path of the Heart, the I AM Presence, and the Soul. This official Dispensation truly offers a deep understanding of the Soul and its evolution; the highest evolution being the Radiant Rose Soul.

Mother Akasha: "There is another Path to embrace after your Awakening, and one that if you choose, can lift and raise you up and out of the limitation of human strife, raising you into the highest vibration of Light & Love, a path of Higher Consciousness ..it is called "The Path of Becoming your True Self" on Earth, also known as "The Path of Resurrection". As you embrace this path, a great raising & expanding activity unfolds within your mind and your feelings, your consciousness, and ultimately your physical garments. You are awake, your Life calls upon you to rise now & become on Earth your True Glorious Self 'I AM' individualized of Mother/Father God. It is a path in which there begins to be experienced by you the second birth, lightning flashes of sudden Light within your mind, great outpourings of Love within your being, all that prepares you in the centre of your consciousness to enter into The Secret Heart of your God Nature, and to pass through 'The Door of Everything' where you will drink of the Waters of Life, the greatest Love of all, The Mother's Love, the Love of the Heavenly Mother that individualizes as your Soul. When that Love begins to express through you it will reveal its Presence and it will nurture and fulfill all that your mind dares to conceive. Your Soul is the Sacred Womb of The Divine Mother of our Universe, Individualized, just as the Christ is the Individualized Mind of The Father."

Koch Brothers, Chamber of Commerce Face Possible Campaign Donation Disclosure After Ruling

By Paul Blumenthal – Huffington Post

March 30, 2012

<http://www.huffingtonpost.com/2012/03/30/koch-brothers-rove-fec-cam...>

WASHINGTON — On Friday evening, the U.S. District Court for the District of Columbia issued a ruling that could begin the process of revealing the identities of secret donors to groups connected to Karl Rove and the Koch brothers.

Posted: 03/30/2012 8:13 pm Updated: 03/31/2012 10:28 am

David Koch is major funder of independent groups, like Americans for Prosperity, that would be forced to disclose their donors for "electioneering communications" under the District Court's ruling in *Van Hollen v. Federal Election Commission* (FEC).

WASHINGTON -- On Friday evening, the U.S. District Court for the District of Columbia issued a ruling that could begin the process of revealing the identities of secret donors to groups connected to Karl Rove and the Koch brothers.

The court [ruled in *Van Hollen v. Federal Election Commission*](#) that the FEC rules that [restricted campaign donor disclosure](#) are not valid and must be changed to provide for disclosure.

"We are very happy to see the judge got it right," says Paul Ryan, a lawyer for the Campaign Legal Center, a campaign finance watchdog that was a part of the team challenging the FEC rules.

Those rules state that donors to groups spending money on "electioneering communications," or advertisements that do not specifically call to elect or defeat a candidate, must only be disclosed if they specifically earmarked their donation to that particular expenditure. Since few, if any, donors to these groups ever earmark their donation for a specific election expense there was no disclosure.

That FEC rule came in the wake of the 2007 Supreme Court ruling in *Wisconsin Right to Life v. FEC*. That ruling overturned a ban, instituted by the McCain-Feingold campaign finance reform law, regarding direct corporate and union contributions to electioneering communications.

Friday's court ruling could reverse a trend started by the FEC rules, and aggravated by the Supreme Court's 2010 *Citizens United* decision, that led to an explosion in undisclosed contributions to electoral efforts. The percentage of independent spending that went undisclosed jumped from 1 percent in 2006 to 43.8 percent in 2010, according to the [Center for Responsive Politics](#).

Advertisements falling under the rubric of "electioneering communications" include those run against President Barack Obama by the [American Energy Alliance](#) and Americans for Prosperity, both non-profits linked to the Koch brothers. All ads run by the U.S. Chamber of Commerce are classified as "electioneering communications." The ruling would require for the first time that contributions to these groups, and many more, be disclosed.

Crossroads GPS, a non-profit linked to Karl Rove, has run millions of electioneering communications against Obama and Democratic senators this election cycle without disclosing any of their donors.

Rep. Chris Van Hollen (D-Md.) challenged these FEC rules in 2011, arguing that the rules preventing disclosure were an unlawful interpretation of the plain language of the McCain-Feingold campaign finance reform law, which mandated disclosure of these donors. Therefore, he said, they should be tossed out by the court.

"This is good news for our democracy and for voters - this victory will compel the FEC to require enhanced disclosures of the funders of campaign-related advertisements," Van Hollen said in a statement.

Judge Amy Berman Jackson stated Friday in her ruling that, "there is no question that the regulation promulgated by the FEC directly contravenes the Congressional goal of increasing transparency and disclosure in electioneering communications."

"In sum, the Court finds that Congress spoke plainly, that Congress did not delegate authority to the FEC to narrow the disclosure requirement through agency rulemaking, and that a change in the reach of the statute brought about by a Supreme Court ruling did not render plain language, which is broad enough to cover the new circumstances, to be ambiguous," the ruling continued. "The agency cannot unilaterally decide to take on a quintessentially legislative function; if sound policy suggests that the statute needs tailoring in the wake of *WRTL* or *Citizens United*, it is up to Congress to do it."

strong>Fred Wertheimer, the president of campaign finance watchdog group Democracy 21 and another one of the lawyers representing Van Hollen, said in a statement, "Now it is the FEC's turn to act. Democracy 21 calls on the FEC to conduct an immediate rulemaking procedure. The FEC must get new rules in place promptly to ensure that outside spenders making electioneering communications disclose the donors funding these campaign related expenditures."

While the ruling unambiguously states that the FEC's rules on electioneering communications are in contravention of congressional intent and should be invalidated, the next step remains murky.

"If this ruling stood and this was the end of it, we'd have much more disclosure," explained University of California-Irvine law professor Rick Hasen. "I don't think that this is going to be the end of it."

On his [Election Law Blog](#), Hasen laid out five possibilities of what could transpire in the wake of this decision, including the FEC immediately writing new, appropriate rules or an appeal from the FEC, prolonging the court challenge. The FEC requires four votes from its six commissioners to appeal a decision.

"This is a good day for those who want to shine light on who's funding our elections," Hasen said. "These things are years in the making. People who think that this is going to solve all the problems immediately are probably going to be disappointed."

The efforts by the Van Hollen team will also continue, according to the statement from Wertheimer. He explained that the legal team will now consult on "a potential second lawsuit challenging the FEC disclosure regulations that have gutted the contribution disclosure requirements for outside groups making independent expenditures."

Independent expenditures are election expenses that do call for the election or defeat of a candidate. This type of spending is what corporations and unions were freed to spend money on in the Supreme Court's *Citizens United* ruling.

USGS: Recent Earthquakes 'Almost Certainly Manmade'

Report implicates oil and natural gas drilling, aka fracking

- Common Dreams staff

A US Geological Survey research team has linked oil and natural gas drilling operations to a series of recent earthquakes from Alabama to the Northern Rockies.

A U.S. Geological Survey (USGS) research team has linked oil and natural gas drilling operations to a series of recent earthquakes from Alabama to the Northern Rockies. (Image: EcoWatch.org) According to the study led by USGS geophysicist William Ellsworth, the spike in earthquakes since 2001 near oil and gas extraction operations is “almost certainly man-made.” The research team cites underground injection of drilling wastewater as a possible cause.

“With gasoline prices at \$4 a gallon, there’s pressure to rush ahead with drilling, but the USGS report is another piece of evidence that shows we have to proceed carefully,” said Dusty Horwitt, Senior Counsel and chief natural resources analyst at [Environmental Working Group](#). “We can’t afford multi-million-dollar water pollution cleanups or earthquakes that could pose risks to homes and health.”

* * *

Environmental Working Group analysis: USGS: [Recent Earthquakes “Almost Certainly Manmade”](#); Report Implicates Oil and Natural Gas Drilling

The USGS authors said they do not know why oil and gas activity might cause an increase in earthquakes but a possible explanation is the increase in the number of wells drilled over the past decade and the increase in fluid used in the hydraulic fracturing of each well. The combination of factors is likely creating far larger amounts of wastewater that companies often inject into underground disposal wells. Scientists have linked these disposal wells to earthquakes since as early as the 1960s. The injections can induce seismicity by changing pressure and adding lubrication along faults.

The U.S. Energy Information Administration reports that between 1991 and 2000, oil and gas companies drilled 245,000 wells in the U.S. compared to 405,000 wells between 2001 and 2010 – a 65 percent increase.¹ As an example of how much more fracking fluid is used, New York state’s review of oil and natural gas drilling regulations in 1988 assumed that companies would use between 20,000 and 80,000 gallons of fluid for hydraulic fracturing per well.² The state’s 2011 review of regulations for natural gas drilling in shale formations assumed that companies would use 2.4 million to 7.8 million gallons of fluid per well – a 100-fold increase.³

According to Anthony Ingraffea, a professor of engineering at Cornell University who has conducted research on hydraulic fracturing, the increase in both the number of wells drilled and the amount of hydraulic fracturing fluid used per well has been driven by a shift of drilling into so-called unconventional formations such as shale in which gas and oil are distributed over very large volumes of rock, which need stimulation by fracking. Companies have increasingly tapped these formations because they have depleted most of

the conventional formations in which gas and oil are contained in a relatively concentrated pool. In these conventional formations, companies can simply perforate the pool with their drill bit and drain a significant quantity of oil or gas. In unconventional formations, however, energy companies must drill more wells because the energy deposits are widely dispersed. Drillers must also use significantly more fracturing fluid to create larger fractures that can access a broader area of oil or gas.

“The rate of drilling and the volume of fluid used have increased tremendously,” said Ingraffea. * * *

Akhila Vijayaraghavan, writing at **Triple Pundit**, [reports](#):

This link is not a new one. The USGS already linked about [50 earthquakes in Oklahoma](#) due to fracking. Their investigation found that the earthquakes had a magnitude ranging from 1.0 to 2.8. In January, a single earthquake of the magnitude of 4.0 was strong enough that it was felt in Toronto. The bulk of these occurred within 2.1 miles of Eola Field, a fracking operation in southern Garvin County.

From [the report](#):

Our analysis showed that shortly after hydraulic fracturing began small earthquakes started occurring, and more than 50 were identified, of which 43 were large enough to be located. Most of these earthquakes occurred within a 24 hour period after hydraulic fracturing operations had ceased. There have been previous cases where seismologists have suggested a link between hydraulic fracturing and earthquakes, but data was limited, so drawing a definitive conclusion was not possible for these cases.

In April and May, [two small earthquakes near Blackpool](#), in England also contributed to suspicions of a link between [earthquakes and fracking](#). Finally, the company responsible, Cuadrilla Resources, admitted that its [shale fracking](#) operations were indeed responsible.

The latest report from USGS states that:

In Oklahoma, the rate of $M \geq 3$ events abruptly increased in 2009 from 1.2/year in the previous half-century to over 25/year. This rate increase is exclusive of the November 2011 M 5.6 earthquake and its aftershocks. A naturally-occurring rate change of this magnitude is unprecedented outside of volcanic settings or in the absence of a main shock, of which there were neither in this region.

Although the report links earthquakes to drilling activities, it is still too early to say whether this is due to the increase in rate of drilling or a specific technique. However the fact remains that it is now an indisputable fact that fracking causes abnormal seismic activity. This definitely puts the oil and gas industry as the most environmentally damaging enterprise. The sooner we are able to switch to more [renewable sources of energy](#), the better. # # #

2012, Ap 3 **Princess Neslisah Osmanoglu, oldest in Ottoman dynasty, dies at age 91 in Turkey**

Bulent Kilic / AFP - Getty Images

People pray Tuesday around the coffin of Neslisah Osmanoglu, last in line to the dynasty that once ruled the Ottoman empire, who died a day earlier at the age of 91. She was buried at Yildiz imperial palace in Istanbul.

By msnbc.com staff

Princess Neslisah Osmanoglu, the oldest member of the Ottoman dynasty, has died at age 91.

Also known as Neslisah Sultan, the princess married an Egyptian prince and was twice forced into exile when both royal households were abolished.

She died in Istanbul on Monday, according to her nephew, Abdulhamid Kayihan Osmanoglu, and her funeral was Tuesday at Yildiz imperial palace, the [London Daily Mail reported](#).

This undated photo by Milliyet newspaper shows Neslisah Osmanoglu in Turkey.

Her nephew did not give a cause of death but The Associated Press, citing later reports, said it was a heart attack.

Turkey's Prime Minister, Recep Tayyip Erdogan praised the late princess.

"She was the poster-child for nobleness who carried the blood of Osman," he said in Parliament, referring to Osman I, the Anatolian ruler who established the Ottoman Empire in 1299. "We remember her with high regard and our blessings."

The princess took the surname Osmanoglu, or son of Osman, along with other surviving members of the dynasty.

Neslisah Osmanoglu was born in Istanbul on Feb. 4, 1921, two years before the Turkish Republic replaced the Ottoman Empire, which had ruled Turkey, parts of the Middle East and eastern Europe for 600 years.

Her grandfather, the last Ottoman Sultan Vahdettin, and all other members of the dynasty were sent into exile in 1924. The princess spent her childhood and adolescence in Nice, France, before moving to Egypt, the Daily Mail said.

"When we were in exile we lived longing for the country," she told historian Murat Bardakci, whose biography of the princess was published last year. "My mother had friends who would go to Istanbul. I would ask them to bring me back a bit of soil from Istanbul, but none did."

Ottoman princesses were traditionally married to members of Muslim royal families, The Associated Press said.

In 1940, Neslisah Osmanoglu married Egyptian Prince Muhammed Abdel Monem, who headed a regency committee that ruled from July 1952 to June 1953.

When new rulers of Egypt turned the country into a republic, the royal couple were accused of plotting against Gamal Abdel Nasser's government and placed under house arrest. They were acquitted and exiled, moving to France.

In 1952, the Turkish government had allowed female members of the Ottoman family to return to Turkey, so the prince and princess moved to Istanbul in 1957, the Daily Mail said.

Prince Monem, born in 1899, died in Istanbul in 1979.

Neslisah Osmanoglu is survived by a son, daughter and a grandson.

This article includes reporting by The Associated Press.

2012, April 3 Keith Olbermann Tells David Letterman He's a \$10M Chandelier

Lucas Shaw Reuters

8:03 p.m. CDT, April 3, 2012

Apr 04 (TheWrap.com) - [Keith Olbermann](#) told [David Letterman](#) Tuesday night that it was all his fault that his [Current TV](#) show, a reincarnation of "Countdown," ended with his being fired after less than a year on the air.

"I screwed up. I screwed up really big on this," he told Letterman.

How so? For not knowing that Current was far from being a fully-developed cable network. It is well-known that Olbermann, whom Current fired last week after months of conflict, was disenchanted with the studio he filmed in and the overall production quality at the fledgling network (to say nothing of the low ratings).

So count this as the most backhanded of quasi-apologies, as Olbermann compared himself to a \$10 million chandelier and Current to the owner of an empty lot without any building permits.

Translation: Current is a pauper, Olbermann is a rare, expensive gem. Just ignore the reports about his being an incorrigible malcontent and missing work.

Letterman joked with Olbermann, who has now had acrimonious departures from Current, [MSNBC](#) and [ESPN](#), handing him an adjustable business card.

Olbermann took it in stride, laughing and telling Letterman that his last appearance on "Late Night" -- in September -- was "the last time I had fun on TV."

While Olbermann ponders his next move, he can take solace in the fact that the show that replaced him, "Viewpoint with Eliot Spitzer," debuted to fewer than 50,000 viewers.

“The human race is challenged more than ever before to demonstrate our mastery - not over nature but of ourselves.”

- Rachel Carson

This weekend's full moon marks a turning point. Spiritual energies flowing through the lunar gateways in April and May culminate in a series of breathtaking planetary alignments in June.

Along the way, we'll enjoy three consecutive supermoons that coincide with the three major festivals of esoteric tradition. These are the Festival of the Christ (April 6), Festival of the Buddha (May 5) and Festival of Humanity (June 4). The religious holy days of Easter, Passover and Wesak are connected with these lunar festivals.

This year, the lunar alignments are “supermoons,” meaning the Moon is at or near perigee (its closest approach to Earth). The proximity of the Moon increases the spiritual energy flowing through the portal formed by the alignment of Sun, Moon and Earth.

The third full moon in the series – the Festival of Humanity (or Goodwill) – is a partial full moon lunar eclipse that forms a grand cross in mutable signs with Mars and Chiron. The next day, Venus will visibly transit the face of the Sun, an event that won't happen again until 2117.

Later in June, the Cancer Solstice is followed by the first of seven exact squares between planetary heavyweights Uranus and Pluto that continue through 2015.

Throughout this time, magic, opportunity and creativity are interwoven with apparent crisis and chaos.

With this line-up, a complete turnaround is possible – the kind of transformation that happens through the process of death and rebirth.

Who are you becoming?

Lunar Festivals

Through the spring lunar festivals, the energy swells like a wave in the distance, gathering momentum before crashing to shore in June.

The full moons are points of initiation and illumination, opportunities for greater mastery, enlightenment, healing and service.

The process involves purification of the ego to allow for a fuller embodiment of the soul. Depending on how entrenched the ego is, this process may be extremely uncomfortable in the moment but leads to new levels of bliss as the soul is liberated.

Shamanic Venus

The current Venus cycle began November 5, 2010, in Scorpio and completes after a brief underworld journey in early June this year. Venus will disappear from our view on May 30, transit the face of the Sun on June 5/6 and return triumphantly as morning star in the east on June 12 when she begins a new cycle in Gemini.

As an expression of the goddess, Venus' passage since early November guides us to embody and honor the feminine. The most shamanic sequence of Venus' long astrological dance, the Scorpio phase speaks to issues of raw, vital, sacred feminine power, the essence of femininity as mystical, creative and sexual. This is the primal, tantric essence of Shakti.

Venus has to do with love, beauty, money, relationships and values. How have you shifted in these areas since November 2010? How has the world changed?

Uranus-Pluto Factor

Uranus-Pluto is the wild card in the current astrological progression. They meet in exact square seven times from June 2012 through 2015. This is a continuation of their long cycle that began with a conjunction in the 1960s. Themes of individual empowerment and revolution are rekindled throughout this period.

Pluto's transit of Capricorn heralds the reconfiguration of society at the level of institutions, economies, politics and social systems. We've already witnessed many examples of this shift around the world.

Uranus in Aries ignites the passions of the warrior. The tension of the square is combative and deeply transformational. As individuals, we must each stand in our truth and find our place within a changing world according to our unique talents and purpose.

Unpredictable Uranus is the driving force behind this year's transition, so predictions about exactly how things will play out are futile. By July, we'll have a sense of what the ongoing square will bring.

How This Feels

While the global drama of the major transits plays out publicly and involves many lives, the individual experience varies. How specific transits and alignments relate to your natal chart tells us which areas of your life will be most affected in coming months and years.

Some common experiences I've been hearing about from people around the world include:

- Sudden and sometimes unexpected changes in jobs, housing, family and relationships
- Major career and financial shifts, including unforeseen new opportunities
- Depression, grief and anxiety
- Feelings of isolation, helplessness, chaos
- An undeniable sense that change is coming, but uncertainty about the details or how to move forward
- Deeply spiritual phenomena, including clairvoyance, clairaudience, clairsentience, startling visions and precognitive dreams

It's a Love Thing

Whether we label our experiences as esoteric, shamanic, religious or otherwise, this passage is awakening us to deeper love. Love of self, love of humanity and the Earth, the cosmos, this creation. All that is.

Mastery begins with self-love. We learn to love and honor sacred other through relationships. Relationships are the building blocks of community. As we experience accelerated evolution through 2012 and beyond, it's wise to connect with others based on shared values – what we cherish and hold dear – and allow other relationships to dissolve if they don't match.

The 2012 passage signals the birthing of a new consciousness through the reconfiguration of our lives and our world. The new paradigm is deeply rooted in love.

Here's the line-up for this segment of the journey:

April 6 – Full Moon in Libra/Aries (supermoon) – Festival of the Christ

April 20/21 – Taurus New Moon

May 1-5 – Beltane/Samhain cross-quarter gateway

May 5/6 – Full Moon in Scorpio/Taurus – Festival of the Buddha/Wesak (supermoon)

May 20 – Gemini New Moon Solar Eclipse (annular)

May 30 – Venus enters the Underworld

June 4 – Full Moon Lunar Eclipse (partial) in Sagittarius/Gemini (supermoon + mutable grand cross) – Festival of Humanity

June 5/6 – Transit of Venus

June 12/13 – Venus heliacal rise in Gemini

June 16-18 – Pre-dawn alignment of Moon, Jupiter, Venus, Sun and Aldebaran

June 19 – Gemini New Moon

June 20/21 – Cancer Solstice

June 23/24 – Uranus square Pluto (first of seven exact from 2012-2015)

As I write this, the (super)moon is rising, and my heart is filled with hope and gratitude. The moon leans in so close I can nearly touch her. I whisper a prayer for the Earth and all beings on this sacred night. May all be blessed.

2012, April 3

IRAN - THE TERRORISM TRUMP CARD

By Brian A. Burchill

Global Research, April 3, 2012

The UK's Guardian recently interviewed "current and former U.S. and European officials with access to intelligence on Iran," and concluded that the United States, its European allies, and even Israel, agree that Tehran is probably years away from having a deliverable nuclear warhead.¹

Twice in recent weeks, CBC News anchor Peter Mansbridge has closely questioned two leaders who hold a different view.

In a January 18th interview, Prime Minister Stephen Harper told Mansbridge that he thinks that "the evidence is...overwhelming" and that it "is just beyond dispute at this point" that Iran's purpose is to develop nuclear weapons. When pressed about Iran's insistence that it has no intention to build nuclear weapons, Harper said "I think there is absolutely no doubt they are lying".²

Harper's claims are all-too-remiscent of US Former Secretary of State Colin Powell's February, 2003, statement at the UN that, with "facts and conclusions based on solid intelligence",³ there was no doubt in his mind that Saddam Hussein was working to obtain key components to produce nuclear weapons.

That intelligence has since been exposed as lies. In fact, the Iraqi chemical engineer who perpetrated the false intelligence, Rafid Ahmed Alwan al-Janabi, confessed his lies on British television April 3rd.⁴

Also troubling is that Harper cited the International Atomic Energy Commission, but in the March 22nd Guardian, the agency's former director-general, Hans Blix, raised concerns about its recent credibility. The IAEC has been charged with over-reliance on unverified intelligence, and pro-Western bias, since the 2009 arrival of its new chief, Yukiya Amano.

More recently, Harper's conclusion was thrown into question during a CBC News One on One interview with US Defence Secretary Leon Panetta, aired last weekend.

Panetta first stated that the best US intelligence has concluded that Iran has not made the decision to build a nuclear weapon. He went on to say that Iran is involved in providing non-nuclear weapons to terrorist-associated groups outside the country.⁵

However, when Mansbridge queried whether containment was an effective policy (sealing off the country to prevent weapons exports to outsiders), Panetta then contradicted his own intelligence claim by saying the US was going to apply economic and diplomatic sanctions because "we cannot allow a country that supports terrorism to have a nuclear weapon."

When pushed to justify the sanctions, Panetta played the debate-ending trump card – the supposed threat of Muslim terrorism – the card spawned by 9/11.

Thus ended the Panetta news segment – Mansbridge did not challenge whether hidden, ubiquitous, amorphous terrorism was a factor in the case of Iran.

The time is long overdue for investigative journalists to challenge such references to unsubstantiated terrorism. They can do so with confidence by becoming knowledgeable about the growing body of evidence refuting the official claims about the events of 9/11.

The 9/11 issue has moved from conspiracy theories and street protests into the realm of laboratories and peer-reviewed science journals. Independent scientific research, as well as FOIA requests and firefighter testimonies, have proved beyond doubt that high-tech incendiaries, not jet impacts and jet-fuel fires, caused the collapses of all three World Trade Center towers.

Nano-technology professor Dr. Niels Harrit of the University of Copenhagen led the team that discovered high-tech

incendiary nano-thermite chips in the dust of the WTC towers.⁶ With reaction temperatures well above the melting point of steel, this substance can be used to cut the steel framework of buildings as they are taken down by controlled demolitions.

A new authority raising serious challenges to the official narrative of 9/11 is the professional 23-member 9/11 Consensus Panel,⁷ made up of PhD's, attorneys, journalists, commercial pilots, and former NASA researchers. The Panel has used the Delphi Method (a standard consensus model borrowed from medicine) to distill the "best evidence" refuting 18 official claims about the major events of 9/11.

In San Francisco, steel-frame architect Richard Gage leads a group of nearly 1700 architects and engineers⁸ calling for a new investigation into the three World Trade Center collapses. Gage is currently on an 11-city tour of Canada, where his technical presentation of the evidence is rapidly converting believers of the official account into doubters of it.

As a result of these investigations, and because nano-thermite can be made in only a few specialized laboratories – which do not include caves in the Middle East – the official claim that 9/11 was perpetrated by Middle Eastern operatives is becoming less credible.

Polls have shown that 35-40% of Western people question the official story⁹ (a 2011 poll from the prestigious Enmid Institute showed that 89.5% of Germans have doubts¹⁰), yet the media refrains from challenging the trigger event for the continuing global war on terror.

The tentacles of the 9/11 tale continue to reach down through time, trumping hard questions from responsible journalists, and enabling vague claims of terrorism to be used as justification to punish and pummel the Middle East.

The question is, if 9/11 did not happen as we were told, do we as a society want to know the truth about that day?
