Ecomarathon, the new way to organize footraces,
by runningintokyo.com,

We started by supporting charity events more than ten years ago,
and turned into a company in 2014. We keep promoting ecology
and social causes as part of our CSR.

- We use the bicycle for transportation, for heavy goods we have a trailer!
- We made our own eco-bag, as Ecomedian M.Takashi demonstrates in the photo above. It is available at our events and often given as prize to the winners.
- We use solar power for our computers, the generator is only used at events that require heavy equipment.
- We recycle our race bibs - in our washing-machine!
- We support eco-friendly charity like Second Harvest Japan, a food bank.
(<http://2hj.org>) 
- We support social causes like aiding refugees.
(<http://refugeesinternationaljapan.org>)
- We built a class-room for children in Cambodia.
- We assist activities by the Japanese government to revitalize local communities, especially on islands in the Seto Inland Sea.

REFUGEES INTERNATIONAL JAPAN
RIJ (国際難民支援会)

We offer:

- Race plans for everybody. A municipality or an NPO, a company or a running club, or just a group of friends.
- Chip timing
- Road or trail
- Insurance
- Website
- Internet registration
- Credit card payment
- Staff training
- Introducing invitational athletes
- Contributions to a charity of your choice

We need from our partners:

- A certain number of volunteers, about one for ten participants.
- A contribution to the free gifts for the runners.
- We do NOT need money. Events are organized to be paid by the participation fee.

Here a list of our yearly events:

- smaller sub-events not mentioned -

General points for all events:

- from 2017, most of our events will have age groups in 10-year brackets and be chip timed. There will be special prizes for finishers over 70-years old.
- We assist with charity events like the Refugees International Japan Loop run, they are not always at the same time, thus not mentioned above.
- Please check our website for details!
