

302
Final Submission of the Conservative Party regarding the Initial Proposals of the
Boundary Commission for England for the GREATER LONDON Region

1. INTRODUCTION

1. This submission represents the views of the Conservative Party and the Greater London Region of the Conservative Party representing the current 73 constituencies within Greater London.
2. We support the reduction of five seats in London which results in an allocation of 68 seats as against the current 73.
3. We support the principle of dividing London into sub-regions for the purposes of allocating constituencies. This ensures that it is most likely that the Factors as outlined in Rule 5 – the Rules for the redistribution of seats (Schedule 2 to the Act) are met, in particular Rule 5 (1) b regarding local government boundaries and Rule 5 (1) c regarding existing constituencies.
4. We have throughout our submissions been conscious of the need wherever possible to:
 - a. respect the boundaries of the 32 London boroughs and the City of London;
 - b. minimise the number of councils involved in any one seat;
 - c. minimise the number of seats within a local authority;

43. In the case of Enfield North, we propose retaining the seat as does the Commission, but adding Ponders End ward which was in Enfield North until 2010 and which was proposed to be part of Enfield North at the aborted review.
44. In the case of Enfield Southgate, rather than split it between five new constituencies as the Commission do, we would retain the whole seat and include Bush Hill Park ward. This is a logical fit since much of the ward shares links with Winchmore Hill to the west and the seat would then have the main railway line as an eastern boundary.
45. Both these retained seats would be entirely within Enfield borough.
46. Our proposals also result in Enfield having only three seats within its boundaries rather than five as proposed by the Commission. This is a considerable improvement under Rule 5 (1) b.
47. Enfield North and Enfield Southgate are both constituencies that are retained with the addition of just one ward so we retain 128,896 electors in their existing constituency as opposed to 93,093 under the Commission's proposals thus being more compliant here with Rule 5 (1) c.
48. We support the commission's proposed Finsbury Park & Stoke Newington which links those areas in both Islington and Hackney boroughs which relate to Finsbury Park and its strong communications hub around Finsbury Park railway and tube station.
