## Africa on the Net *(Thematic links of interest relevant to the work of the ECA)*

### Chemical Engineering

#### [Innovations in nanotechnology for water treatment](#)

Important challenges in the global water situation, require novel innovative water technologies in order to ensure a supply of drinking water and reduce global water pollution. Against this background, the adaptation of highly advanced nanotechnology to traditional process engineering offers new opportunities in technological developments for advanced water and wastewater technology processes. 2015

#### [Charging cell phones in sub-Saharan Africa with foot power](#)

If you have minimal access to electricity, a foot pedal could be the next best way to power your phone – at least, that's what two students are testing out in Lesotho. Jan 2015

#### [Global market change to drive demand for heavy rare earth elements](#)

For investors in technology-metals-production it is a clarion call. Go, the bell says, and invest in the domestic discovery, development, and production of technology metals and materials. Feb 2015

### Medical and Health Sciences

#### [Reducing the neglected burden of viral hepatitis in Africa: Strategies for a global approach](#) 2015

The burden of liver disease may dramatically increase in the near future in Africa, where screening and access to care and treatment are hampered by inadequate disease surveillance, lack of high-quality tools to assess chronic liver disease, and under estimated needs for human and financial resources.

#### [Structural adjustment and public spending on health: Evidence from IMF programs in low-income countries](#) 2015

The IMF has claimed that its programs enhance government spending for health, and that a number of innovations have been introduced to enable borrowing countries to protect health spending from broader austerity measures. Critics have pointed to adverse effects of Fund programs on health Spending or to systematic under funding that does not allow LICs to address health needs.
