# business intelligence manager

Module

# BIM

VIP Business Intelligence Manager (BIM) is a licenced module that forms part of the Premier total solution. This reporting solution uses the power of MS Excel as a report writing tool, providing meaningful insight and interpretation of your VIP data.

BIM is about getting the correct information to the right decision makers at the right time. It is an enterprise-wide platform that supports reporting, analysis and decision making.

## Features

- Your company is already empowered to write reports through your investment in MS Excel software and skills. Use VIP BIM to maximise this investment
- Consolidate and automate financials for companies in one workbook
- Eliminate manual intervention, reducing the risk of human error
- Security access control to data and reports
- VIP BIM delivers a variety of data views with tables already joined and fields labelled descriptively to facilitate simplified report writing
- Unlimited flexibility in filters and parameters to control data access
- Existing templates can be used to fast track custom report writing
- Easy to use - Windows Explorer look and feel

- This is one tool delivering a consistent single version of the truth in MS Excel

- Compile reports from any ODBC compliant source

## Benefits

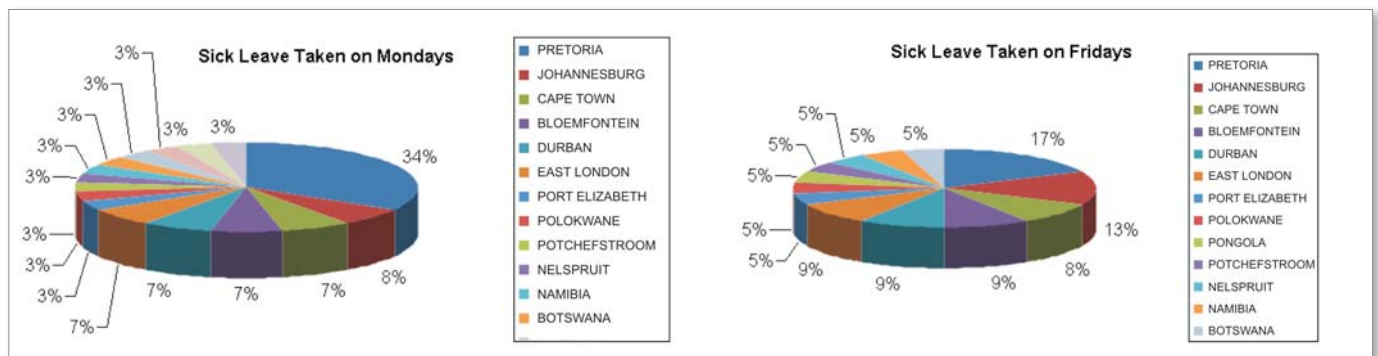

- VIP BIM uses MS Excel, allowing more users to write their own reports and thereby maximising end-user participation
- Simple and cost effective reporting solutions
- Offers optimal flexibility to users
- VIP BIM becomes a standard desktop tool
- Offers a powerful, hassle-free user experience
- Seamlessly integrates with technological developments
- Skills acquired through the use of VIP BIM are relevant to other applications
- VIP BIM is flexible and responsive and adjusts to growing reporting demands

## Advantages

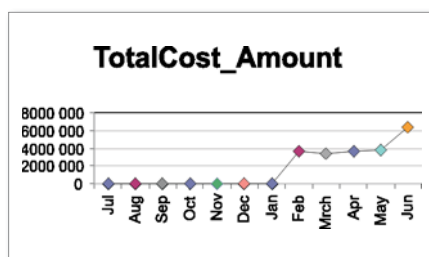

- Reports can be created from your VIP database
- Third party systems can be incorporated in the same report (e.g. Accpac, Pastel, Syspro, Sage, SAP Business One, Sybiz). This means information from your accounting software as well as your payroll system can be combined into a single report
- Users can either write their own reports or a VIP Special Solution Consultant can customise reports according to a user's need
- Run reports with the click of a button

## Standard Reports

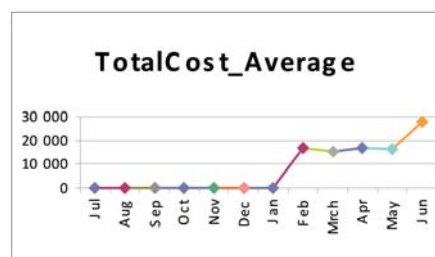

### Sick Leave Management

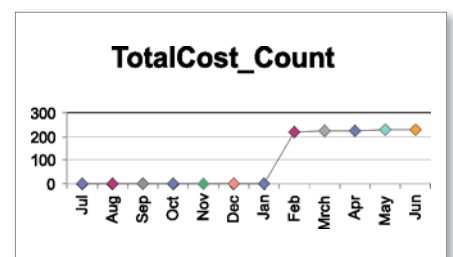

### Trend Analysis

Total Cost amount: Showing a trend in total salary cost for a specific company in a specific period.

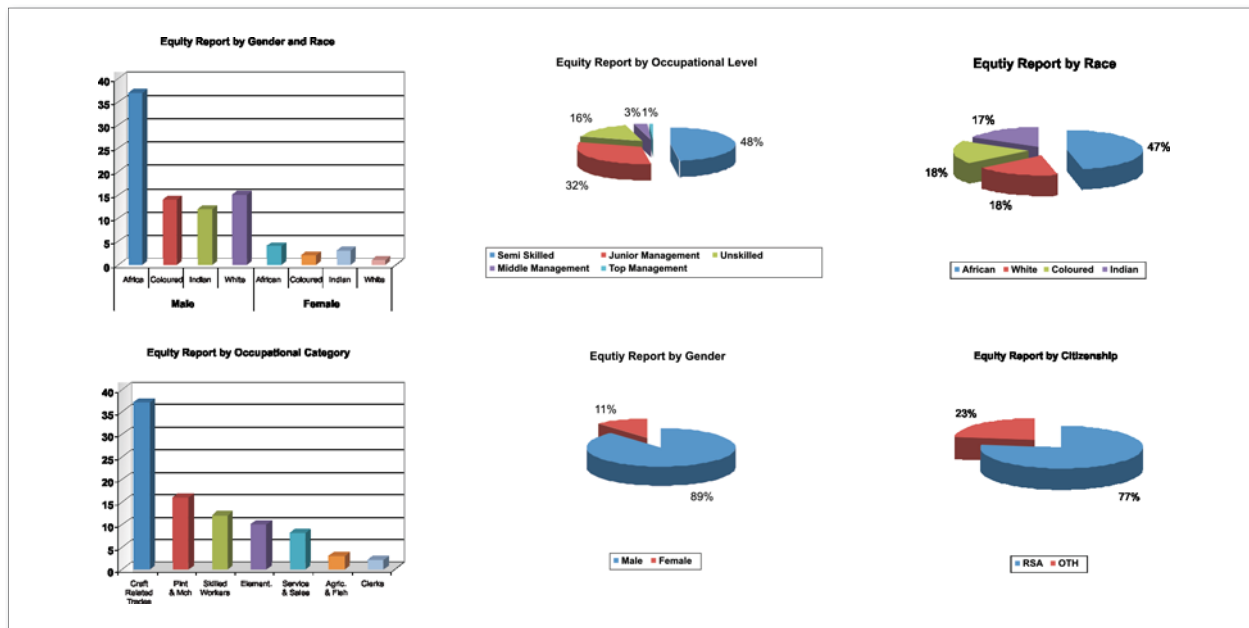

Total Cost Average: Showing a trend on average salary cost for a company. The average is calculated on the actual amount of salary cost of employees from a company in a specific period.

Total Cost Count: Showing a count of employees from a specific company in a specific period.

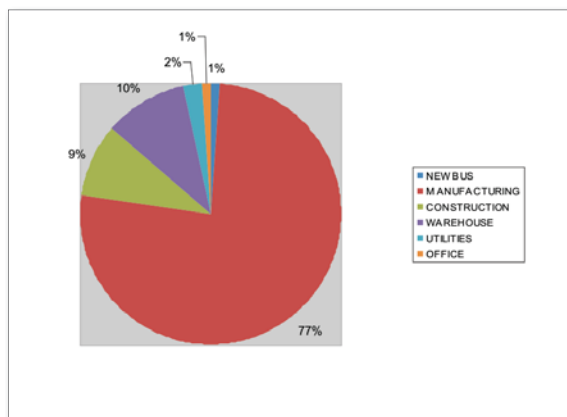

## Employment Equity Report

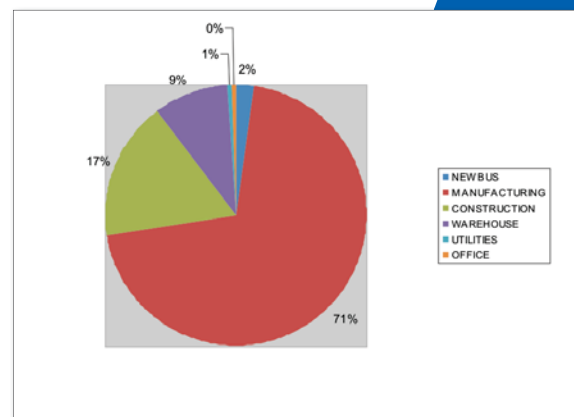

## Current Period Earnings vs Previous Period Earnings sorted per Department

## Total Earnings for the Year to date sorted per Department

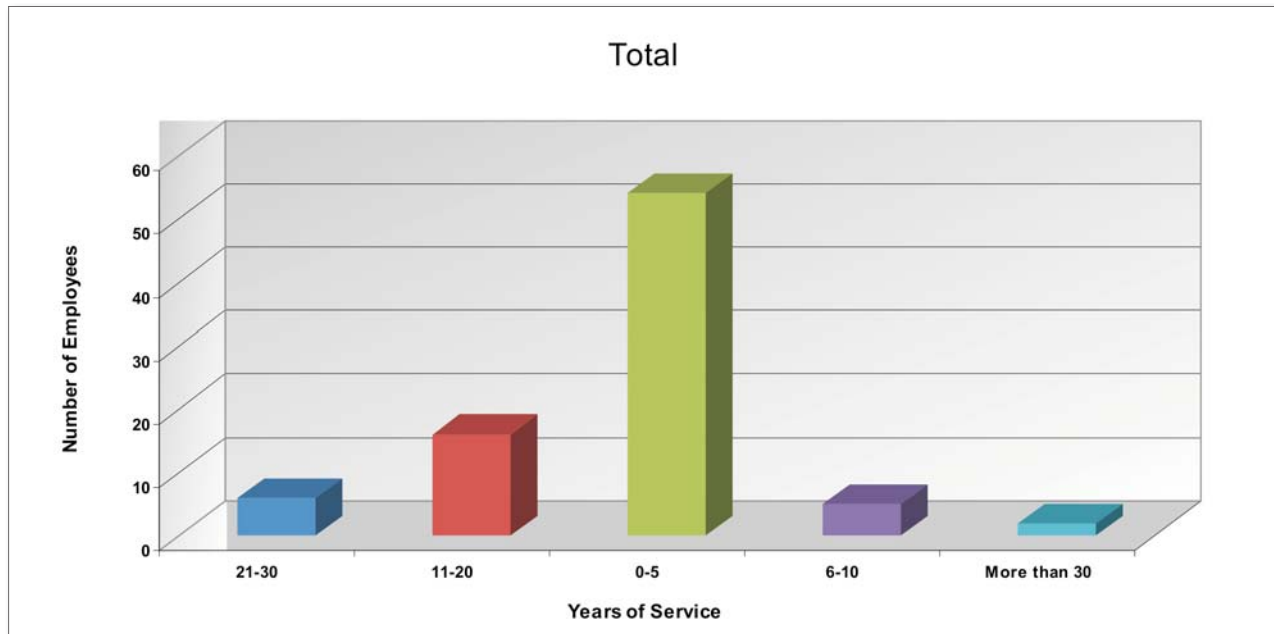

## Total Earnings for the Month to date sorted per Department

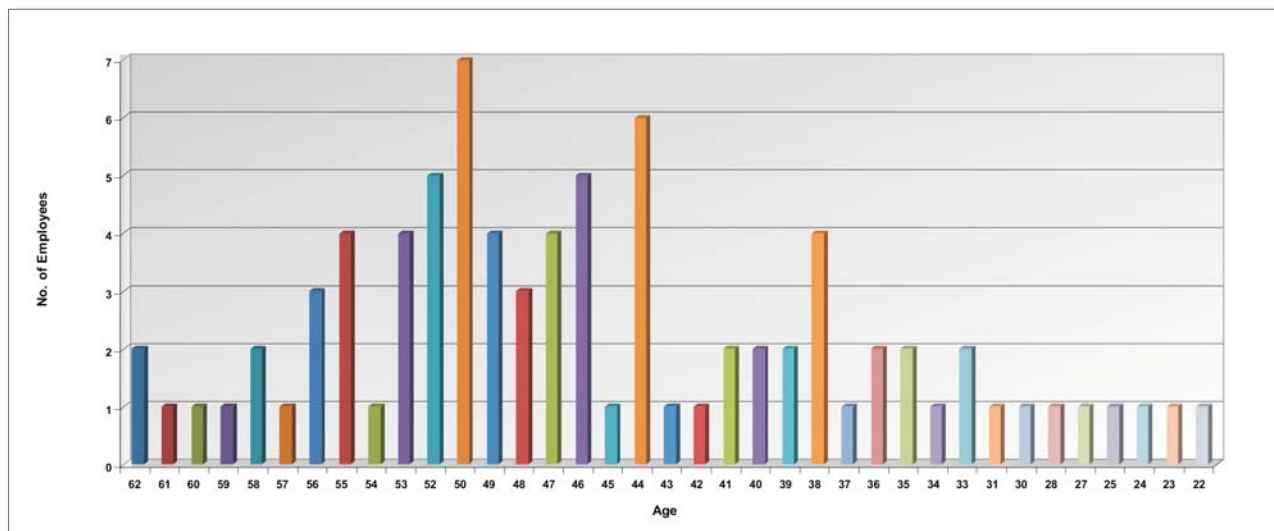

## Years of Service Listing

This graph shows the number of employees in specific years of service categories.

## Employee Birthday List and Age Analysis

This graph shows the number of employees in specific age categories.

## How VIP BIM works

- VIP BIM uses an ODBC connection to access data from various compliant data sources and offers the administrator and user separate interfaces to manage the report creation process
- VIP BIM is then integrated with Microsoft Excel which is used as a powerful and familiar desktop reporting platform
- The diagram illustrates how VIP BIM works:
