

## SOUL-VOYAGERS NETWORK

### **The Vision**

A growing 'community of spirit' united by inner experience and the deep understanding and compassion (for self and others) that arises from transpersonal journeying.

### **Core aims and objectives**

The Soul Voyagers Network seeks to expand and promote the deep inner healing work facilitated by regression practice, holotropic breathwork, ancestral work, constellation work, psychodrama, bodywork, shamanism and other related transpersonal therapies and spiritual paths.

It also seeks to promote the vital importance of such a synthesis of understanding and practice and to find ways of maintaining the deep bonds that are created between those that have shared the experience.
