

Crystalline Water

Water is the most important element that sustains life on this planet. On spiritual basis, it has a great role in the Ascension process. It can hold and transmit a range of Ascension frequencies in its pure form. Apart from its ability to hold energy, water molecules can take up particular structures close to freezing points relating to various emotions and energies present on the environment.

Such structures are visible when the crystal structure grows large enough to be visible. At the same time, every molecule in the structure is aligned in the same crystalline lattice as the larger structure. Basically its believed, even in liquid form water has the flexible structures formed

between close proximity molecules. Much of the energies in water is held by the specific structures formed when it is energized.

Memory of Water (The basic concept in Homeopathy) relies on the ability of water to hold the memory and Properties of some molecules dissolved in it. Strong shaking or boiling is used to release the old memories and then potentiating with energy, crystal or a salt. This is the basic concept of Elixirs.

A large group of Masters work on the Water in Oceans to anchor the great amount of energy that the Crystalline grid offers to earth.

Ganga has been the source of water as well the spiritual inspiration from the great Masters who lived in the higher Himalayas. Many a masters have shared their energies in the water of Ganga and that is one reason of the great spiritual importance of the river.

Mythology says, it's the heavenly river that was brought to earth and then held on by Shiva.

The Crystalline Water Concept

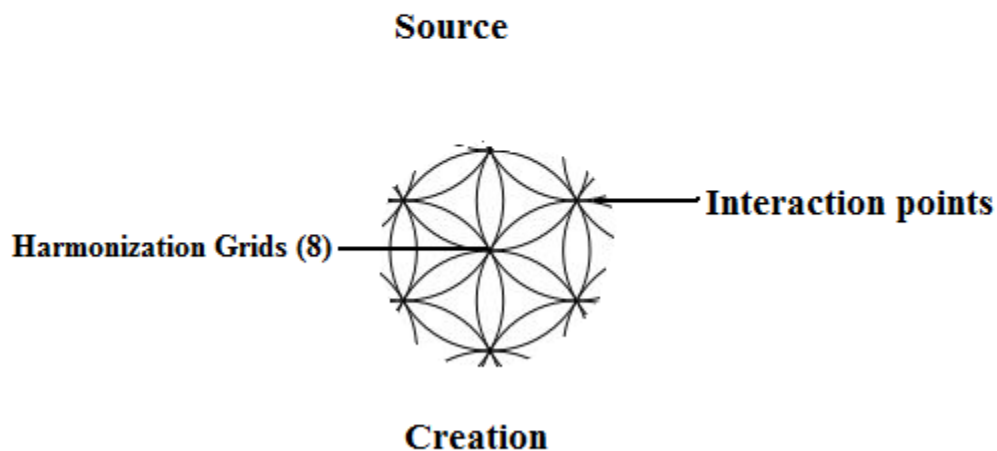

Something similar to the heavenly river beliefs, the higher energy layers were being anchored in the structure of water. Like a many layers of Axiatonals work on the water molecule itself.

Water molecule now resonate in the Crystalline Grid through the basic structure. Once activated, small number of molecules can create strong resonance to activate large water bodies. The energy harmonization ability is permanent for the active molecules and the frequencies that flow is quite high.

Any disharmonized energy or molecule in the vicinity of such active molecules get cured of the misaligned energy as it gets transferred to a active molecule. The active molecule later clears and harmonizes the misaligned energy with the Grid (Source and Creation).

The scale of energy flowing through crystalline water falls in the range of +9 to +10 (On a scale of 0-12) which is quite very high than 5D or 6D energies.

Energy Harmonization Model in Crystalline Water

Healing effects

- Large water bodies can activate instantly to a very high energy with the energy.
- The water heals and cleanses the area, environment, the animals and plants.
- Drinking crystalline water heals and cleanses on the cellular level.
- This water is great for creating any other potion as it amplifies the effect.
- Crystalline water can be intentionally programmed to work in certain areas like specific organ healings, beautifying, body weight control, detox, Youthening etc.

Activation of Water

Remember to activate large water bodies you meet. It would be a great service. To activate, say “Crystalline water”.

Drinking or bathing water: hold the container and say “Crystalline water”. Allow the energy to settle. And use.

Large water bodies:

Intend to activate, touch the water and say “Crystalline water”.

Water in your Body, in plants and animals:

Visualize your body as water and then say “Crystalline water”.

Also use it for fruits, edible or massage oils, and any wet eatables.
